

Coronavirus disease (COVID-19) COMMUNITY SITUATION REPORT

FNHA Public Health Response

March 14, 2022

Changes from the previous Community Situation Report are in red.

COVID-19 Updates

First Nations Cases in BC – As of March 9, 2022¹

- There have been a total of **19,793** First Nations COVID-19 cases (**19,519** lab diagnosed cases and **274** epi-linked cases). This is an increase of **143 cases among First Nations people in BC** since the last published report.
- Out of the **19,793** cases, **8,467 (42.8%)** are in or near community; **10,581 (53.5%)** are off reserve. Information on in or near community/off reserve is not available for **745 (3.8%)** cases.
- There are total **201** active First Nations COVID-19 cases in British Columbia. There are **81** active COVID-19 cases residing in or near community.
- Sadly, there have been a total of **256** COVID-19 related deaths reported among First Nations living in BC since the beginning of the pandemic. **Three** additional deaths are reported since **the last published** report.
- There have been a total of **1,871 (9.5%)** First Nations people hospitalized due to COVID-19 since March 1, 2020. Of these, **828** hospitalizations are individuals who live in or near community and **1,040** off reserve. Information on in or near community/ off reserve is not available for **three** cases.

*Total number of cases (n=19,793) includes twenty seven (27) cases reported as Out of BC – Alberta residents, two (2) cases reported as Out of Canada – USA residents, eight (8) cases reported as Out of BC – Saskatchewan residents, three (3) cases reported as Out of BC – Ontario resident, one (1) case reported as Out of Canada - Country other resident, one (1) case reported as Out Of BC – Quebec resident and two (2) case reported as Out Of BC - Northwest Territories/Nunavut resident.

¹ Case counts in this report are likely an underestimate of the true number of COVID-19 cases due to changes in testing strategies driven by the Omicron variant (<http://www.bccdc.ca/health-info/diseases-conditions/covid-19/testing/when-to-get-a-covid-19-test>). The number of COVID-19 cases reported herein are based on laboratory confirmed cases from the public health laboratory dataset and epi-linked COVID-19 cases from regional health authority line list datasets. These case counts do not include people who only tested positive by rapid antigen tests and self-reported through the provincial COVID-19 positive test result reporting form (<https://reportcovidresults.bccdc.ca/>).

Regional Active cases and Testing data as of March 9, 2022

	Fraser Salish	Interior	Northern	Vancouver Coastal	Vancouver Island	Total N (%)
Active First Nations COVID-19 cases ^a	25	64	62	23	26	201
Total persons tested ^b	13,513	15,031	17,705	11,784	13,507	71,562
Cumulative percentage positivity (%) (Feb, 2020 to March 09, 2022)	9.2%	13.7%	22.5%	11.4%	13.4%	14.2%
Percentage positivity (%) over the past week (March 03, 2022 to March 09, 2022)	11.4%	18.2%	26.6%	12.3%	28.4%	20.2%
Testing rate (total tests per 100,000 First Nations people)	113,701.5	87,011.7	75,187.9	107,453.3	64,952.2	85,869.7

^a Algorithm to define people who are removed from isolation was updated on February 5, 2021, to reflect change adopted by PHSA. Updated algorithm assigns cases who are lost to follow up and whose surveillance date (reported date and if not available then result date) \geq 20 days before the line list case dataset date to "removed from isolation. One (1) case is reported as "Out of BC" Resident.

^b Geographical Information (RHAs) for 22 BC First Nations people who are tested for COVID-19 is not available. They are included in total number of First Nations people tested in BC.

*Total number of cases (n=19,793) includes 745 cases without information on LHA of residence and "In or Near Community" analysis. Information about in or near community analysis is not available for thirteen (13) active cases.

Note: Analyses for in or near community include lab confirmed cases and epi-linked cases with known geographical information. Other cases (including cases tested outside of BC) are included in the cases by health authority. **As of March 9, 2022, there were 81 active COVID-19 cases among First Nations people living in or near community.**

The cumulative percent positive for all COVID-19 tests completed for First Nations in BC was **14.2%** as of **March 9, 2022**. The rate of positive cases was **12,191.3 per 100,000** people among First Nations. The rate of positive cases among other residents of BC was **6,760.6 per 100,000** people.

Epidemic curve for COVID-19 cases among BC First Nations by episode date, surveillance date (line) and health authority (coloured bars),^a British Columbia February 23, 2020 (Week-9) – March 9, 2022 (Week-10, 2022*) (n=19,793)

^a Episode date is now defined as date of illness onset, hospital admission, or death. When those dates are not available, earliest lab date (collection date or result date) is used, and if unavailable, surveillance date is used. Report date used previously is now replaced with surveillance date (laboratory result date); if unavailable, report date is used.

^b Data source: BCCDC’s line list data received from RHAs (up to March 9, 2022) and PHSA’s public health lab data (up to March 9, 2022). This epidemiological curve represents the weekly cases reported among First Nations in BC. The proportion of cases within each region is colour coded and the case counts each day are represented by the solid black line. The incidence per 100,000 are represented by the dotted line. Regions are represented in the diagram as: Fraser – Dark blue, Interior – Red, Northern – Light Blue, Vancouver Coastal – Orange, and Vancouver Island – Green.

Vaccine Distribution

- As of March 9, more than 121,100 individuals 18+ years of age and more than 20,000 individuals aged 5-17 years have received at least one dose of a COVID-19 vaccine in First Nations communities, as well as outside of communities by regional health authorities. These individuals are First Nations people, as well as some non-First Nations people who were vaccinated in community. Of these individuals, more than 110,700 First Nations people 18+ years of age and more than 14,400 First Nations individuals 5-17 years old have received at least two doses. Of these individuals, more than 57,600 First Nations people 5+ years of age have received third doses.²
- As of March 9, 84.5% of 18+ years and 79.2% of 5+ years status and status-eligible First Nations people in BC have received at least one dose of a COVID-19 vaccine.
- As of March 10, 90.7% (4,521,678) of eligible people 5+ years in BC have received their first dose of COVID-19 vaccine and 86.6% (4,316,745) have received their second dose.

² The age of vaccinated people included in both the aggregate and row level vaccine datasets have now all been changed to their age as of December 31, 2021 to be comparable to last year’s reports.

First Nations COVID-19 Vaccination Coverage, by Health Authority

Doses 1, 2 and 3 (PHSA e-form, PIR, dose 1= 120,719, dose 2= 109,237, dose 3= 51,547), 5+ years, up to March 9, 2022

* HA information was not available for 1,962 clients for dose 1, 1,385 clients for dose 2 and 310 clients for dose 3.
 ** These analyses were only possible for Status and Status eligible First Nations, and do not include non-status First Nations
 Please note that the coverage rates shown include 5-11 year olds and cannot be directly compared to previous rates for 12+ years as the total population eligible for vaccination is now larger.

First Nations COVID-19 Vaccination Coverage, by Age Group

Doses 1, 2 and 3 (PHSA e-form, PIR, dose 1= 122,681, dose 2= 110,622, dose 3= 51,857), 5+ years, up to March 9, 2022

* These analyses were only possible for Status and Status eligible First Nations, and do not include non-status First Nations
 ** Please note that coverage rates are approximations and are capped at 100%.

Provincial COVID-19 Cases – updated as of March 11, 2022, 3:35 p.m.

- Since the start of the pandemic, there have been 352,039 confirmed cases in BC, and 2,935 deaths from COVID-19
- There are 368 people currently hospitalized and 46 people in intensive care

*Total number of cases (n=351,751) include 389 cases reported as "Out of Canada" residents. Above figure provides regional distribution of COVID-19 cases (n=351,362) reported as BC residents.

Data Sources: British Columbia COVID-19 Dashboard

Active Outbreaks (as of March 11, 2022)

- Long-term care/assisted living centres/independent living/mental health and substance use facility: **13** outbreaks
- Acute care units: **1** outbreaks

* A geographic distribution of COVID-19 by Local Health Area can be found [here](#).

* A weekly update on Variants of Concern can be found [here](#).

First Nations Community Statistics from Indigenous Services Canada (March 10, 2022):

Access Restrictions: 128 (same)	Security Checkpoints: 66 (same)
Band Offices Inaccessible: 83 (same)	State of Local Emergency: 46 (same)
	EOC Activations: 119 (same)

FNHA Resources and Supports

Information for BC First Nations Individuals

Visit: <https://www.fnha.ca/what-we-do/communicable-disease-control/coronavirus/public> to find out more including

- COVID-19 vaccine
- Self-isolation
- Testing and symptoms
- Medical support including Virtual Doctor of the Day Service
- Mental health and cultural supports

Information for Community Leaders

Visit: <https://www.fnha.ca/what-we-do/communicable-disease-control/coronavirus/community-leaders> to find out more including

- COVID-19 vaccine

FNHA Response

Working with First Nations

The FNHA is working in partnership with First Nations communities to ensure communities' needs are met, including:

- Maintaining essential services to support First Nations communities during this pandemic
- Providing COVID-19 funding resources and wrap around supports including for medical transportation, self-isolation and quarantine; see the [FNHA Community Support Guide](#) for more information; support requests can be sent to COVID19needs@fnha.ca
- Supporting First Nations communities in refreshing their Communicable Disease Emergencies Plans
- FNHA continues to maintain operational availability to respond to COVID-19 support requests over the weekends and during public holidays; at those times, Health Benefits isolation accommodation support and regional on-call support is available
- Launching virtual care services including First Nations Virtual Doctor of the Day and First Nations Virtual Substance Use and Psychiatry Service
- Site selection, training and deployment of Point of Care Testing for COVID-19 is underway

Working with Partners

The FNHA is continuing to work with our provincial and federal partners towards aligning response efforts in support of First Nations communities and people living away from home across the province. This includes:

- Maintaining regular communication and updates with Regional Health Authorities, Emergency Management of BC, Ministry of Health, First Nations Leadership Council, and Indigenous Services Canada to proactively identify needs and address issues Supporting planning at both the provincial and regional level for the Rural, Remote and Indigenous Framework
- FNHA is in discussions federally and provincially to support BC Restart including reopening of public buildings, and return to work and business operations for facilities where safe and appropriate

Vaccinations

- The FNHA has worked closely with First Nations communities and other health partners to support vaccine distribution and planning and to prioritize available doses for all communities
- As of March 31, all First Nations adults living on all 203 reserves in BC had access to a first dose of vaccine (Moderna or Pfizer), based on a "whole community" approach
- Second dose clinics in First Nations communities are also now completed; however, FNHA continues to support communities' vaccination clinics, as needed, and is working to supply vaccine doses to local health units so that communities can order them as part of their established ordering pathways

Personal Protective Equipment

- The FNHA continues to work with federal and provincial partners to obtain personal protective equipment (PPE) for health care staff and first responders in all communities
- First Nations communities requiring personal protective equipment during the COVID-19 emergency can send their requests to COVID19needs@fnha.ca
- The form for ordering personal protective equipment is available here: <https://www.fnha.ca/AboutSite/NewsAndEventsSite/NewsSite/Documents/FNHA-Process-and-Considerations-for-obtaining-additional-PPE-for-BC-First-Nations-Communities-Annex-A.pdf>
