Health through wellness

# FNHA eHealth Team

Sharing wise, community-driven practices for wholistic wellness

- eHealth is part of First Nations Health Benefits and Services.
- We support adoption of Electronic Medical Records (EMR) and Telehealth technologies to enable primary care for First Nations across the province.
- Our eHealth teams support the following areas:
  - Clinical Adoption
  - Planning and Development
  - Project Management
  - Operational Support

First Nations Health Authority  
Health through wellness

# First Nations Health Information

Sharing wise, community-driven practices for wholistic wellness

## The Challenge

- Multiple disparate EMR systems + paper in each community
- Inconsistent access to client health information across the care team
- Inadequate access to provincial and regional clinical information systems

## Resulting in:

- Risk of compromised quality of care and decreased health outcomes
- Resource burdens and operational inefficiencies for staff and providers
- Clients repeating clinical and demographic information
- Inability to aggregate and or use information for planning and decision making

First Nations Health Authority  
Health through wellness

# The FNHA Pan-Provincial EMR Vision

Sharing wise, community-driven practices for wholistic wellness

## Our EMR Vision:

- One chart per client
- Client records shared among relevant providers
- Providers can access the client chart in community or virtually
- Access to health information is monitored and auditable
- Supports clinical standardization
- Consent-based

First Nations Health Authority  
Health through wellness

# Why MOIS EMR?

Sharing wise, community-driven practices for wholistic wellness

MOIS is provided by Bright Health, a BC based, not-for-profit society:

- Significant EMR implementation base in BC
- All-included license price, no additional fees for other modules
- MOIS interoperability and functionality is comparable with other EMR solutions
- FNHA's solution partner for VDOD/VSUP and Kucén, FNHA's new Medical Transportation Information System

*“Health information at the tips of your fingers!”*

First Nations Health Authority

# FNHA Pan-Provincial EMR Features

Sharing wise, community-driven practices for wholistic wellness

## MOIS Features Include:

- Secure access to client information from anywhere
- Quick registration
- Scheduling (private and shared daybooks)
- Waitlist, resource, and group booking options
- Integrated care plans
- Custom and standard forms, letters, and templates
- Notification and alerts recalls, reminders, and other important information
- Incorporates First Nation specific information
- Flexible user permission options to match community and provider needs
- Client health maintenance screening reviews

*“Auto-populating forms makes tasks so much more efficient!”*

First Nations Health Authority  
Health through wellness

# FNHA Pan-Provincial EMR Interoperability

Sharing wise, community-driven practices for wholistic wellness

Using the Pan Provincial EMR as standard for FNPCIs:

- Messaging and coordination of care within the circle of care.
- Secure faxing to allow referral directly from the patient chart
- Providers can receive and download lab results through Excelleris
- Access to [CareConnect](#) and [PharmaNet](#) from MOIS.
- Secure sharing of clinical documents between supporting EMRs through Clinical Data eXchange [CDX](#) standard
- Consistent reporting across data sets through leveraging standards

*“Messaging and tasks make it easy to collaborate with my team.”*

# Pan-Provincial EMR Project Scope

Sharing wise, community-driven practices for wholistic wellness

- Prioritized programs and service include:
  - FNPCI sites and staff
  - FNPCI supporting programs and services
  - FNPCI participating and supporting First Nations communities
  - FNHA Virtual Services (vDOD and vSUPS)
  - Other approved First Nation community sites

First Nations Health Authority  
Health through wellness

# Partnership Approach

Sharing wise, community-driven practices for wholistic wellness

## **FHNA provides:**

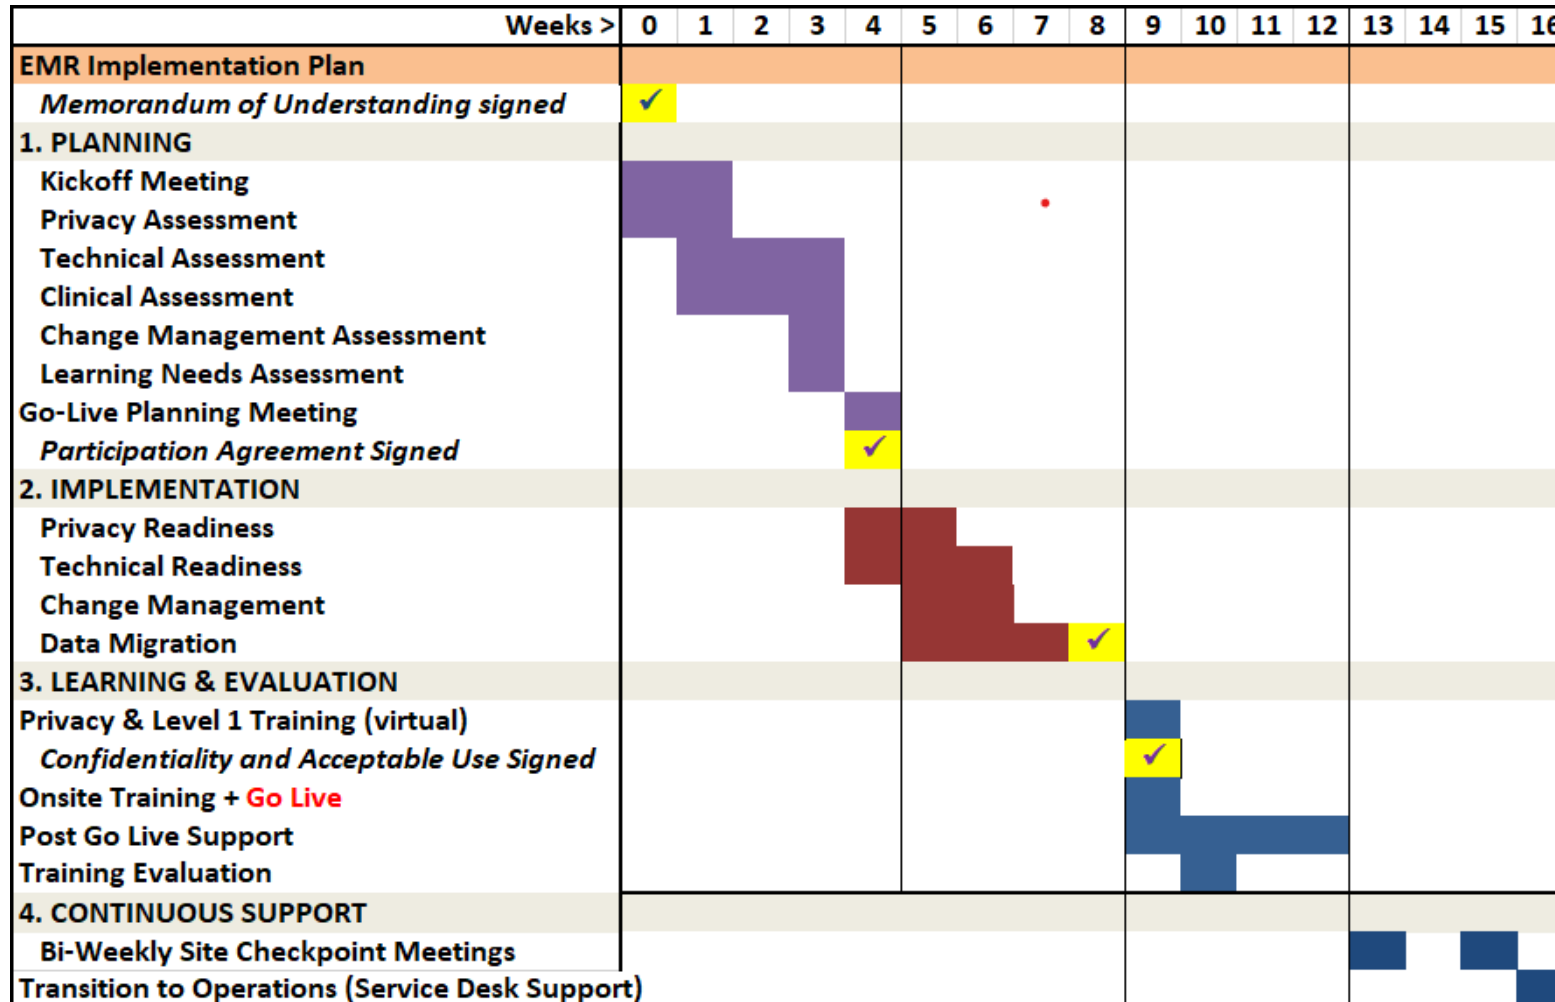

- A. Manage licenses, software, training, and support for Users and Champions
- B. Privacy & Security education and training for the appropriate use of EMR
- C. On-site training for implementation and on-going refresher training as required
- D. Configure system and security roles to meet FNHSO/FNPCC access & workflow requirements
- E. Support collection of explicit consent from clients
- F. Vendor management and EMR product development

## **FNHA will also support communities in implementing the following:**

1. A clinic-based Champion (decision maker) is assigned to work with the team and support adoption in the clinic
2. A Privacy Lead is designated and trained to respond to breaches or other privacy-related issues
3. Staff complete Privacy & Security Training and sign 'Confidentiality and Acceptable Use Agreement'
4. Clinic Network Security is up to date with encryption and strong passwords
5. Computers are free of viruses and up to date with security patches, anti-virus and malware software
6. Staff to use Multi-Factor Authentication to access EMR
7. A resource is assigned to review audit logs and ensure ongoing appropriate use of EMR

# Typical Implementation Timeline

Sharing wise, community-driven practices for wholistic wellness

# Success Factors for EMR Implementation

Sharing wise, community-driven practices for wholistic wellness

Based on Our Early Learnings:

1. Primary Care centre legal structure and provider relationships must be established
2. Need commitment from FNPPC providers to chart in FNHA EMR
3. Client express consent required for storage and specified uses of personal health information
4. EMR implementation should be aligned to clinical practice patterns and workflows
5. Need to consider existing arrangements with EMRs in community e.g. Regional HA EMR use in community by some providers.
