Healthy Food Guidelines

For First Nations Communities

First Nations Health Authority
Health through wellness
Acknowledgements

First Nations Health Authority would like to thank the creators of the Healthy Food Guidelines For First Nations Communities. We truly hope that First Nations Healthy Food Guidelines will be useful in supporting a healthy eating environment within First Nations communities in British Columbia.

The First Nations Health Authority gratefully acknowledges the contributing authorship of Karen Fediuk and Angela Grigg as well as the contributions of the many community members and health workers who inspired and assisted in guiding the development of the guidelines. We also wish to thank the authors of the “Guidelines for Food and Beverage Sales in BC” and many other nutrition education tools that have been adapted for use in these guidelines for communities.

Foreword

“Food Sovereignty” is the Right of peoples, communities, and countries to define their own agricultural, labour, fishing, food and land policies, which are ecologically, socially, spiritually, economically and culturally appropriate to their unique circumstances.

“Indigenous Food Sovereignty” also includes the elements of sacredness and self-determination. As Indigenous People we understand that food is a gift and that we have a sacred responsibility to nurture healthy, interdependent relationships with the land, water, plants, and animals that provide us with our food. This also means, having the ability to respond to our own needs for safe, healthy, culturally relevant indigenous foods with the ability to make decisions over the amount and quality of food we hunt, fish, gather, grow and eat. These rights are asserted on a daily basis for the benefit of present and future generations.

Our traditional foods have nourished us well since the time of our creation and have been of fundamental importance to our culture. We developed sophisticated techniques to preserve a variety of foods year round to keep our bodies strong and this knowledge has carried us well into our current place. Many challenges now exist for First Nations who wish to access traditional foods. The land and water have experienced changes that now limit the ability to access adequate amounts of our traditional foods. At the same time, our lives have been widely influenced by an abundance of processed, commercially influenced food sources and lack of access to nutritious whole foods. It is our hope that that the Healthy Food Guidelines For First Nations Communities will provide our communities with the information and tools to assist in serving healthy foods at conferences, community gatherings, meetings, programs, special events, school/ daycare meal programs and even fundraising.

How to use these guidelines

These guidelines are intended to support community members in educating each other about better food and drink choices to offer in schools, meetings, homes, cultural and recreational events, and in restaurants.

There is information presented for various types of community members, from general background information on the issues facing communities to specific handouts that can assist individuals in choosing better snacks for lunches.
Section 1. Introduction

It is well known that we are eating far differently than how our people were eating in the past. For many of us, our current diet and activity patterns are not only putting our health at risk but also the health of those whom we model choices for - our children.

For many, there is enough food in our houses to keep our stomachs full but not always enough of the foods we need to keep our bodies and minds strong. Our communities are facing many health challenges that have a relation to our eating and activity including obesity, diabetes, depression, cancer and heart disease. Our communities have the natural strength, and resilience that comes from our relationship to the natural land and all that it provides for us.

We know from community participation in a number of studies that active participation in hunting, gathering and using traditional foods helps prevent chronic disease. Traditional food activities keep us physically active, spiritually grounded, and the nutrients offered by the plants and animals that we eat from our territory keep us strong. Many of us are faced with barriers in carrying out our traditional activities including: lack of access to good hunting/harvesting areas, high costs for fuel and equipment, time, and concerns about contaminants. Today, healthy eating involves making choices from the foods available from many sources, including the natural land, water, farm, grocery store, and restaurant.

While we cannot address in these guidelines the steps to change our traditional harvesting environment, we can address some steps we can take to change the nutrition environment within our communities. We can suggest ways to make modern choices that reflect traditional values such as giving, sharing, humility, wholeness, and land stewardship.

Nutrition studies suggests that we can reduce the risk of diabetes and heart disease by eating plenty of vegetables and fruit daily, limiting our consumption of foods that are high in calories but offer little nutritional value, and maintaining a healthy weight.
How are we doing now?

Traditional Foods

Each year we affirm our identity and reinforce our ties to our indigenous food system and territories by harvesting and eating our traditional foods. Our traditional food remains an important aspect of social and cultural events, all of which center traditional food as an important aspect of being who we are. We thank the salmon, eulachon, clams, moose, deer, elk, beaver, birds, seaweed, berries, roots and medicines and they in turn nourish our bodies and spirits and help protect our body from illness and remind us of our past and help us think about our future.

Participating in harvesting activities, such as gathering berries and roots, hunting, harvesting shellfish, or fishing brings many rewards. Our bodies are energized and the stress we can carry is lessened by the physical activity necessary for harvesting and processing our foods. Harvesting activities also brings with it the pleasure of socializing, exchanging news and stories, and respecting and connecting with the spirit of the land. After the work is all done, we have food to put away in our cupboards to share with our families.

Fruit and vegetable consumption

Traditionally, we spent much of our time harvesting and processing many kinds of roots, berries, and greens. From spring until late fall there were different kinds of plants to enjoy and our ancestors spent much time in drying and storing a variety of plant foods for trade and use in the winter months. We truly ate a wide variety of plant foods that today would be classified as fruits and vegetables. However, many of the fruits and vegetables we eat now are limited to what we grow in our garden or buy from the store. Few of us eat the recommended number of fruit and vegetable servings to provide the health protective effects against the development of many chronic diseases such as heart disease, cancer, diabetes.

Sweetened beverage consumption

Sugar-sweetened beverages used to be a rare treat. Now they maintain a constant presence in many of our homes, schools, offices, and at recreational and cultural events. Researchers are finding that the more children drink sweetened beverages, the more weight they are likely to gain. Although children are natural regulators of their general calorie needs, when sweetened beverages are consumed this internal regulator is defective. As a result children do not increase their activity to use additional calories or cut back on other foods to compensate (Cornell, 2003). Sugar sweetened beverages place us and our children at great risk for obesity which further increases our risk of type 2 diabetes. This does not mean that diet drinks or beverages sweetened with artificial sweeteners are the answer. The long term safety of large amounts of artificial sweeteners has not been proven in children. Encourage water as the best beverage.
Healthy Weight

Achieving and maintaining healthy weights is a concern in our communities. Recent studies suggest that 25% of adults and 42% of children have healthy weights.

On-reserve First Nations Body Mass Index (BMI), by gender, 2002-2003 (percent)

What is recommended to reduce our risk?

To reduce our risk of chronic disease, we all need to change what we put on the table.

We can work towards:

- **Making Our Communities Healthier** - Working to change the nutrition environment and promoting healthy eating is essential. Whether you are a community health professional, a teacher, a band councilor or a parent/caregiver, EVERYONE can play a role in changing the nutrition environment.

- **Increasing our use of traditional foods** - Protecting, restoring and relying on our traditional foods more, can provide greater food security to our community and healthier food choices. We know that when traditional foods are eaten, we are more likely to get the nutrients our bodies needed then when traditional food is not eaten.

- **Decreasing our use of sugar-sweetened beverages** - Reducing the use of sugar sweetened beverages will help protect our teeth and our children’s health. A recent study suggests that most of the sugar sweetened beverages are eaten at home while 15% seems to be occurring in schools.

- **Increasing our intake of vegetables and fruits** - Our traditional plants and many of the fruits and vegetables from the farm and market (most of which were originally cultivated by Indigenous Peoples of North, Central and South America) have medicinal, nutrition and healing properties that can protect us from chronic disease if we eat a variety daily. A serving is about 1⁄2 cup portion in any form.

- **Serving healthier food choices in reasonable portions** - By learning how to modify and choose recipes that have less fat, sugar, and salt and by following a balanced plate approach when serving foods at the table, we can collectively reduce our risk for obesity and diabetes.

- **Increasing the number of community gardens in our communities** – Promoting the development of community gardens brings the community together to promote healthy eating and provides nutritious foods for community events.

💡 Ways to help your body

- Eat lots of vegetables, fruit and berries -5-8 servings everyday by including vegetables and/or fruit at meals or snacks-
  - Become comfortable with reading labels to make healthier food choices
- Choose wholesome fresh food over packaged and processed food
- Know what is in your food and beverages
- Make time for cooking and eating together at the table with family and friends
Creating a Healthy Nutrition Environment

The figure below shows several areas within the community that changes can take place in order to have an effect on eating habits.

While promoting healthy eating at the individual level is important, we know that we can only make significant and long-lasting individual changes in our eating habits if there is support for these changes throughout our community.

Following the guidelines in this resource and effectively changing what food is offered at meetings, in school and daycares, at community feasts and advocating for changes at local caterers, restaurants and food stores will positively affect our nutrition and will promote better health.

There is much more to influencing the nutrition environment than just putting healthy foods on the table and we have many opportunities to influence the broader nutrition environment and the food self-sufficiency of our nations. Some of the opportunities that promote this work are listed in other First Nations Health Council resources such as the “ADI Resource List” and the “Act Now Community Tool Kit”.

Section 2. Healthy Food Guidelines

Food is part of celebration, ceremony, social functions, learning opportunities and is one of our best ways to bring people together. There are certain times when we should ‘just enjoy’ food and with so many occasions to offer food, we have plenty of opportunity to promote healthy choices for our people by ensuring that healthy foods are available almost all of the time.

Serving healthy foods in communities means having healthy food selections at all community activities that include food such as: community programs, gatherings, meetings and special events as well as at daycares and schools and even as part of fundraising events. Serving healthy foods starts with the types of food offered as well as the amount of food offered.

In this section, guidance is provided for both types and amounts of food and some sample buffet meal plans are provided.

For more detailed information on the TYPES of food see: “Guidelines for Healthy Foods for Communities”

For more detailed information on the AMOUNT of food see: “Serving Healthy Foods and Amounts”.

Healthy Food Guidelines

The following table of foods is based on the Guidelines for Food and Beverage Sales in BC Schools. It has been modified to assist First Nations communities in the promotion of healthy food choices. The table is broken into Food Groups and 3 categories based on nutrition criteria that assess the calories and amount of sugar, fat and salt (sodium) in these foods. The first category “Leave off the Table” contains foods that are generally high in fat and sugar and/or salt. Some of these foods may be an important part of celebration and should be included only on those special occasions. The second category “Sometimes on the Table” includes foods that may be low in fat or salt (sodium) but do not meet all of the criteria of foods that fit within the third category “Great on the Table Anytime”.

In order to promote healthy eating, we encourage communities to make and serve as often as possible the types of food listed under Great on the Table Anytime and Sometimes on the Table. Foods that are listed under the Leave Off the Table category should be offered as little as possible and only for special occasions or feasts.
### Food Group

**Grains**

Grains must be the first or second ingredient (not counting water)

Grain ingredients may include:

- rice, pot barley, corn, amaranth, quinoa, millet, oats, buckwheat, bulgur, kasha, whole wheat couscous, etc.

- flours made from wheat, buckwheat, spelt, corn, rye, rice, potato, soy, millet, etc.

- flours that are made into:
  - breads, pasta, baked goods, etc

<td>• Few Trans fat free, low-fat baked grain and corn snacks (baked tortilla chips, popcorn)</td>
<td>• Brown Rice Noodles</td>
</tr>
<tr>
<td>• Commercial cereals high in sugar</td>
<td>• Whole grain cereals (limited sugar, fat content)</td>
<td>• Few whole grain and corn snacks (cereal mix, tortilla chips, hot air popcorn with no butter)</td>
</tr>
<tr>
<td>• Instant, flavoured oatmeal</td>
<td></td>
<td>• Whole oatmeal or granola (homemade with fruits, sweetened with juices, baked)</td>
</tr>
</tbody>
</table>

Foods high in starches and sugars (natural or added) can leave particles clinging to teeth and put dental health at risk. Grain food choices of concern are sugary cereals, granola and granola bars, crackers, cookies and chips (corn, wheat, rice, etc). The BC Dental Public Health Committee suggests eating these clingy foods only at mealtimes, and choosing at snack time grain choices that clear quickly from the mouth.
| Food Group       | Leave off the Table                                                                                                                                                                                                 | Sometimes on the Table                                                                                                                                                                                                 | Great on the Table Anytime                                                                                                                                                                                                 |
|-----------------|------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| Vegetables & Fruit | A vegetable or fruit puree must be the first or second ingredient, not counting water                                                                                                                                  | Raw, canned or cooked fresh/frozen fruits and vegetables (including wild greens and berries) that are cooked or prepared with low salt, low-fat sauces (e.g., low-fat milk-based) or meet Sometimes on the Table Criteria (ex. Fruit in light syrup, low sodium canned vegetables)                                                                 | Raw, home canned (or sodium < 150 mg/serving) or cooked fresh/frozen berries or cooked fruit and vegetables (including wild greens and berries) that are served plain or with the minimum amount of dressing/serving recommended in the Condiment Section                                                                 |
|                 | (Juice and concentrated fruit juice does not count as a fruit ingredient for this food group – see “Vegetable & Fruit Juices”)                                                                                         |                                                                                              |                                                                                                               |
|                 | • Raw, canned or cooked fresh/frozen fruits and vegetables served with buttery, creamy or overly sweet sauces (ex. Fruit in heavy syrup, canned vegetables with sodium >300 mg/serving)                                                                 | • Fruit with a sugar based coating (e.g., yogurt- or chocolate- covered raisins)                                                                                                                                  | • “Indian ice-cream”                                                                                                                                                                                                       |
|                 | • Dried fruit (e.g., fruit roll-ups/leathers/chips) or fruit juice snacks (e.g., gummies)                                                                                                                                 | • Dried fruit (fruit main ingredient), small portion, see health note below.                                                                                                                                       | • Home made salsa with fresh tomatoes or canned diced tomatoes and minimal salt                                                                                                                                            |
|                 | • Regular potato/vegetable chips                                                                                                                                                                                      | • Low-salt, baked potato/vegetable chips                                                                                                                                                                           |                                                                                                                                                                                                                          |
|                 | • High Salt (sodium) Pickles (see Condiments)                                                                                                                                                                       | • Low salt (sodium) pickles                                                                                                                                                                                          |                                                                                                                                                                                                                          |
|                 | • Coated/breaded and deep fried vegetables (e.g., French-fried potatoes, onion rings)                                                                                                                                 |                                                                                                                                                                                                               |                                                                                                                                                                                                                          |

Foods high in sugars and starches (natural or added) can leave particles clinging to teeth and put dental health at risk. Vegetable/fruit choices of concern include fruit leathers, dried fruit, and chips (potato or other). For more information on how food and beverage choices can affect dental health, see www.bced.gov.bc.ca/health/health_publications.htm

<td></td>
</tr>
<tr>
<td></td>
<td>• Juice drinks with added caffeine, guarana or yerba</td>
<td>preceded by water in the ingredient list)</td>
<td></td>
</tr>
</tbody>
</table>

The natural sugars in 100% juice will elevate blood sugars. It is also easy to consume many more calories by drinking juice compared to eating whole fruits. The BC Dental Public Health Committee recommends choosing plain water more often than juice. 100% juice and other fruit drinks contain sugars and acids (natural or added) that dissolve tooth enamel when sipped frequently. To avoid prolonged exposure to these sugars and acids, they suggest that only plain water be allowed in classrooms except at designated eating times.

</table>
| **Milk & Calcium Containing Beverages** | • Most candy flavoured milks  
• Most eggnogs  
• Most hot chocolate mixes made with water (see also “Other Beverages”)  
• Smoothies made with Leave off the Community Table ingredients  
• Some blended sweetened regular and decaf coffee drinks  
• Powdered coffee whitener  
• Flavoured, creams and coffee whiteners | • Most basic flavoured milks and fortified soy and rice drinks  
• Yogurt drinks  
• Some eggnogs if lower in sugar and fat  
• Most hot chocolates made with milk  
• Smoothies made with Better on the Community Table ingredients  
• Whole, 2% milk, soy milk or canned milk for coffee | • Plain, unflavoured, fortified soy and rice drinks  
• Skim, 1%, 2% milk  
• Some hot chocolates made with milk and very little added sugar  
• Smoothies made with Great on the Table Anytime ingredient  
• Decaf unsweetened tea/coffee latte |

Whole milk (3.5% MF) should be used for children under 2 years old. A lower fat milk is suitable for individuals older than 2 years old. For those children who cannot consume milk, continue with a soy-based or other recommended infant formula until the child is 2 years old before changing to a recommended soy or rice milk.

</table>
| **Nuts & Seeds (Mixes or Bars)** | • Nuts with a sugar based coating (e.g. Chocolate, yogurt covered nuts)  
• Salty or sugary nut/seed bars and mixes (e.g. sesame snap bars)  
• Nuts/seeds highly salted or flavoured, roasted in additional oil | • Nuts/seed bars and mixes with nuts/seeds or fruit as the first ingredient and no sugar based coatings | • Nut/seed bars and mixes with nuts/seeds or fruit as first ingredient (homemade bars)  
• Nuts/seeds – natural or dry roasted |

Nut and seed mixes or bars containing dried fruit, sugars, crackers or other sugars/starches (natural or added) can leave particles clinging to teeth and put dental health at risk. The BC Dental Public Health Committee suggests eating these clingy foods only at mealtimes, and choosing at snack time foods that clear quickly from the mouth, such as plain nut/seed choices (may be savory seasoned). For more information on how food and beverage choices can affect dental health, see [www.bced.gov.bc.ca/health/health_publications.htm](http://www.bced.gov.bc.ca/health/health_publications.htm)

*Sport/electrolyte drinks containing added sugars are not recommended. These beverages may be useful during sports events lasting more than 1 hour on hot days. Plain water is best for exercising.

*Other Beverages may provide excess liquid calories, caffeine, artificial sweeteners, or acids and often displace healthier food/beverage choices. Limit portion sizes of “Other Beverages” (except plain water) to: 250 mL or less for children (5-12) and 360 mL or less for 12 and older. Consider keeping coffee/tea Off The Table for gatherings with a prenatal/postnatal, child or youth focus.

  • Herbs and salt-free seasonings, garlic, pepper, lemon juice. Mrs. Dash  
  • Low sodium pickles  
  • Horseradish: 10 - 45 mL  
  • Fresh salsa |
**Serving Healthy Amounts**

We can reduce the risk of diabetes in our communities by putting healthy foods on the table at meetings, community events and in our schools and daycares.

**Keeping meals healthy can be achieved by:**

- Following the Healthy Food Guidelines document when menu planning
- Using the sample menu plans in Section 3

**Offering healthy portions can be achieved by:**

- Following the look of food on a healthy plate
- Pre-plating food and beverage items based on the serving portion guide in “Eating well with Canada’s Food Guide: First Nations, Inuit and Métis
- Purchasing foods that are not super-sized
- Serving foods and beverages in appropriate size bowls, plates and cups.

💡 **Ways to help your body**

- Know what an appropriate portion size is
- Become comfortable with reading labels to make healthier food choices
Serving Healthy Portions

Step 1. Re-think the Plate

One of the biggest changes we can make to reduce our risk from chronic disease is to re-think our plate. Promoting the Healthy Plate at community events is an important start.

1. Keep starchy foods limited to ¼ of the plate. This is about 1 cup or a portion no larger than one fist. Replace highly process/white starches with more whole grain choices.

2. Fill up half of the plate with 2 or more different kinds of vegetables.

3. Serve a healthy modest portion of fish or meat (about 3-4 ounces or 90-120g)

4. Complete the meal with milk, milk alternative, or water

5. Serve sauces and dressings on the side.
Step 2. Choosing Serving Dishes

Getting people to cut down on portions is easier if the dishes, cups, glasses and serving spoons are not super-sized.

The larger the plate or glass, the more we fill. Using smaller plates can encourage people to re-think how much they need and whether they should go for a second helping

Use these plates
- 8 inch plate for breakfast and lunch
- 10 inch plate for dinner (visual)

Use these bowls
- 8-12 oz (240 – 375 ml) Bowl for Cereals, Salads and Soups
- 4 oz (120 ml) bowl for Desserts

Use these glasses
- 6-8 oz (240 ml) Glasses and Cups for Beverages

Use these ladles
- Use a ½ cup (120 ml) ladle for sauces, soups, casseroles, stews
- For salads, use a 1 tbsp (15 ml) ladle

Serve condiments, dressings, sauces on the side wherever possible.

Step 3. Serving Size Guide

Use this serving size guide adapted from Eating Well with Canada’s Food Guide to check how many servings from each food group is being offered. This is useful information for menu planning purposes.

Children need 1 serving of 2 food groups for a snack and 1 serving of 3 groups at a meal. Adults usually can eat 2-3 servings of vegetables and fruit at a meal or snack.

Ideally, a meal is planned to offer appropriate amounts from each food group. Children have an innate ability to know when they have eaten enough. Let children say how much they want of a food by deciding whether to eat what is offered and by deciding to have additional portions (‘seconds’).
Vegetables and Fruit
- ½ cup (125 ml) fresh, frozen or canned berries, fruit or cooked vegetables
- 250 mL (1 cup) raw leafy vegetables or wild plants
- 1 piece of fruit (1/2 cup)
- ½ cup (125 ml) vegetable juice (choose whole fruit more often, drink water when thirsty)

Grain Products
- 1 slice (35 g) whole grain bread or ½ whole grain bagel (45 g)
- 1 piece of 2” by 2” by 1” whole grain bannock (35 g)
- ½ whole grain pita (35 g) or ½ whole grain tortilla (35 g)
- ½ cup (125 ml) cooked whole wheat or white pasta or couscous
- ½ cup (125 ml) cooked wild, brown or white rice
- 1 cup (30 g) cold cereal or ¾ cup (175 mL) hot cereal

Milk and Alternatives
- 250 mL (1 cup) milk, lactose free milk, fortified soy or rice beverage
- 175 g (¾ cup) yogurt
- 50 g (1 ½ oz.) cheese
- 1 can canned salmon with bones

Meat and Alternatives
- 75 g (2 ½ oz.)/125 mL (½ cup) cooked fish, shellfish, poultry, lean meat or wild game
- 175 mL (¾ cup) cooked beans
- 2 eggs
- 30 mL (2 Tbsp) natural peanut butter
Meal Buffet Ideas for Meetings and Community Events

To plan for healthier food choices at meetings and community events, use the Menu Models for community meetings provided. As well, more specific menu samples are provided with Different Types and Amounts of food that are needed to feed a varying number of people. The amounts provided for foods and beverages are based on the number of adults. If children are attending the meal, cut down on amounts for caffeinated beverages.

**Buffet Table**

- Consider a buffet table that will offer eight (8) menu items: Salads will be 3 of the 8 menu items, soups may be 1 of the 8 menu items, entrees will be 2 of the 8 menu items, grains will be 2 of the 8 menu items, and desserts might be 1 of the 8 menu items.
- Containers (ex. Bannock in traditional basket), Water jugs,
- Salads: if you offer three salads, two are green salads and one is a starchy or creamy salad.
- Soups (broth based soup, cream soups)
- Grains (bannock in basket, rice or potato (1/8 to 2/8)
- Meat/Fish ¼ table
- Desserts (Side- cakes cut up in ½ cup servings, fresh fruit, cookies (small))

💡 **Tips for preparing a community feast**

- Serve water or sparkling water or milk at the table instead of sugar drinks or coffee
- Serve whole grain products instead of white starch products
- Serve green salads but put the dressing on the side
Breakfast Menu Model For Community Feasts & Meetings

Give your group an energizing start to the day by providing a tasty and nutritious breakfast. Including a variety of food from each food group will help your guests put together their own healthy plate. This sample menu plan is based on a group of 30 people. If you are serving for a larger event you may want to make additional selections from each food group to provide your guests with more variety.

Serving Dishes: Provide 1 cup bowls, 6 ounce glasses and cups and 8 inch luncheon plates for healthy portion
Condiments and Dressings: Use reduced fat or spreads and dressings: light mayonnaise, reduced calorie salad dressings, 7% sour cream, 1-3% yogurt, low sodium salsa (Harlan’s Specialty, Fresh is Best, President’s Choice organic salsa)
Seasonings: Use Mrs. Dash (low sodium seasoning) Salt and Pepper
Tips for serving healthy food and bringing down costs

Offering prepared foods can eat away at your food budget. Many pre-prepared foods are high in calories, fat, salt or sugar and cost more. Keeping pre-prepared and low nutrient snacks off the table and out of school can save money and can be good for your community’s health and waistline.

• Plant a garden to support school meals and community events. Can the vegetables in the fall or freeze for later use
• Choose Frozen or canned vegetables and fruit - they are affordable and nutritious options. Ensure that you always have frozen vegetables on hand, they are a great back up when you have not been able to re-stock fresh groceries.
• Hold a community canning event
• Use beans, lentils and other legumes instead or meat or in addition to meat in soups, stews, chilis
• Stock up on canned goods and staples when they are on sale. Store them safely and use them up by their “best-before” date.
• Skip the cookies, baked goods, chips and other salty snack foods, soft drinks and other high calorie beverages. They cost a lot and are low in nutrients. Stick to the four food groups and buy the basics.

Adapted from Health Canada

💡 Ways to Help your Body

• Choose cooking methods that require little or no added fat such as roasting, broiling, baking, grilling, steaming, poaching, boiling instead of frying
• Serve whole grain products more often than refined grains every day
Many recipes books and online recipes provide low-fat, low sodium, lower calorie options. You can make these recipes healthier, as well as your own favourites by taking out some of the fat, calories, sugar and salt (sodium) and increasing the amount of fibre. You can do this by trying some of the suggestions in this “Make Your Recipes Healthier” chart.

<table>
<thead>
<tr>

Section 4. Promoting Healthy Eating in Children, Youth and Family Programs

Promoting Healthy Eating in Children, Youth and Family Programs

Early childhood is very important for developing healthy food choices, eating behaviours and motor skills. Families, schools and community programs have a unique opportunity to play a role in demonstrating healthy eating practices that will lead us down a path of wellness and diabetes prevention. Many children spend about ½ of their waking hours in childcare and school making this setting an important influence on the development of healthy eating practices and healthy growth and development.

We know that our traditional diet was very balanced and healthy. Our eating patterns depended on where we lived: coastal peoples ate more seafood, inland people ate more game foods and elsewhere in Canada and the Midwest, communities relied heavily on corn, beans and squash. But wherever we lived, we did not eat much processed or junk food until very recently. The amount of food we eat and the types of food that are in our diets (sugar sweet beverages and foods high in fat and sugar) are leading us down the path of obesity and poor health.

In Canada, one in five children are eating the daily recommended number of fruit and vegetable servings. In Canada, under half (41.5%) of First Nations children are at a healthy weight. Many children in First Nation communities are at risk for inadequate intake of important vitamins and minerals such as vitamin D, calcium, iron, and zinc. High consumption of junk food, absence of breakfast, and poor quality foods do not contribute these important nutrients to our children’s diets. Children who go to school hungry or have a diet lacking in good nutrition are less likely to do well in school as hunger, tiredness or weakness make it difficult to concentrate. Every day children spend almost half of their waking hours in school. School can have an important influence on the development of healthy eating and physical activity habits.

To protect our children’s health and reduce their risk of disease related to poor nutrition and obesity, let’s ensure that meals and snacks are offered that:

- Form a healthy meal pattern based on Canada’s Food Guide and the Healthy Food Lists on page 40.
- Do not include access to sugar-sweetened or artificially sweetened beverages such as pop or fruit crystal drinks.
- Allow enough time for children to eat healthy foods when hungry and turn attention elsewhere when full.
- Encourage water as desired with and between meals.
- Do not include any foods that are on the “Foods to Avoid” list.
Additionally, we need to encourage parents and children to send healthy food choices to school by offering guidance on healthy choices by:

- Offering guidance on healthy choices
- Creating a list of what cannot be eaten while in the school or program setting
- Sharing a list of healthy treats that can be brought for birthdays and celebrations
- Promoting water as the beverage of choice between meals and limiting juice (100% unsweetened) to a maximum of ½ cup per day.
- Set aside foods that are not appropriate and send home at the end of school or the program.

If there is a school canteen or vending machine, it’s important to sell foods that are considered healthy options. Healthy options are foods that meet certain nutrition criteria (See Foods from the Table “Healthy Foods for Communities”).

To assist your community in improving the nutrition environment in order to promote healthy eating and reduce our children’s risk of obesity, we have organized this section to provide

- Nutrients of special concern
- Portion size guidelines
- A healthy food list
- Foods that are not appropriate to have at the school or program
- Healthy treats for birthdays or celebrations
- Sample menu cycles
- Portable Ideas for Field Trips
- Foods that can fit for sales in schools or fundraising
- Foods that are not appropriate for sale in schools or for fundraising
- Sample nutrition policy
**Nutrients of Special Concern**

Aboriginal children are vulnerable to inadequate intakes of certain vitamins and minerals, particularly vitamin D, calcium and iron. Planning menus and creating food policies that include little or no processed foods that are high in sugar, fat and salt, will help to ensure that our children are adequately nourished.

<table>
<thead>
<tr>

</tbody>
</table>

💡 **Tips for preparing a community feast**

- Colour It Up! (see Appendix 3 for serving a variety of fruit by season)
- Select lean meat, wild game and alternatives prepared with little or no added fat, sugar or salt.
- Choose vegetables and fruit prepared with little or no added fat, sugar or salt.
Meals and Snacks

Healthy eating can be promoted by offering foods from all four food groups at a meal time and at least two food groups at a snack time AND offering appropriate portion sizes and healthy food choices.
Portion Size Guidelines

Children’s appetite will vary day to day. These amounts should act as a guide to determine how much food to prepare and what to offer at meals and snack times. Children and youth may choose to eat more or less than what is suggested here. Younger children will eat towards the lower range of the serving size suggested while older children, youth and adults will eat towards the larger range. Youth and adults may also have more than one serving from the Vegetables and Fruits or Grain products at a meal time.

Preventing Young Children from Choking on Food

To prevent your child from choking, use care when selecting and preparing food. Experts suggest that round, firm foods should not be given to children younger than age 4 unless the food is chopped completely. Foods that can be choking hazards include:

- Seeds (for example, sunflower or watermelon)
- Nuts
- Popcorn
- Whole grapes (cut into halves or quarters)
- Chunks of peanut butter
- Raw vegetables
- Chewing gum
- Hard or sticky candy
- Chunks of meat or cheese
- Hot dog (slice lengthwise)
- Raisins
- Bones in fish (remove)

Cut foods small so that it is no larger than the tip of your smallest finger starting at the base of the fingernail.
## Healthy Food Choices List

| Vegetables and Fruit Group | 2½ cup of  
|---------------------------|---------------------------------------------------------|
|                           | Fresh fruit  
|                           | Vegetable juice  
|                           | Raw, steamed, baked vegetables including wild greens and berries that are prepared plain and served with a minimum amount of dressing or cooked with low salt, low-fat sauces (e.g, low-fat milk-based)  
|                           | Salads with low-fat dressings  
|                           | Baked potato with low-fat topping  

| Grains |  
|--------|---------------------------------------------------------|
|        | Unsweetened cereal *(sugars less than 5g/serving or 10g/serving if fruit is an ingredient)*  
|        | Whole grain waffles  
|        | Mini whole grain bagels  
|        | Whole grain breads  
|        | Enriched breads, buns  
|        | Tortillas, wraps, pita bread (whole wheat)  
|        | English muffins (whole wheat)  
|        | Pancakes  
|        | Baked bannock,  
|        | Lower fat baked goods that are small in size (about ½ cup)  
|        | Low-fat crackers (no trans fat)  
|        | Pasta and pasta salads with very little dressing  
|        | Brown rice or brown and white rice mix  
|        | Rice noodles  
|        | Trans fat free, low-fat baked grain and corn snacks (baked tortilla chips, popcorn)  
|        | Up to 2 ounces or ¼ cup for cookies  

| Milk and Alternates |  
|---------------------|---------------------------------------------------------|
|                     | 1/2 cup to 1 cup fortified soy or rice milk  
|                     | 1/2 cup to 1 cup of 2%,1% or skim milk (whole milk for children under two years of age)  
|                     | 3/4 cup of 1 – 3.5% fat yogurt  
|                     | ⅓ cup of Low sodium cottage cheese  
|                     | 50 g (1.5 oz) of Cheese  
|                     | ⅔ cup of puddings/custards that have less than 20 gram of sugar

For more detailed information see Section 2, “Guidelines for Healthy Foods for Communities” for more examples of foods that are Great on the Table Anytime
Healthy Treats for Celebrations

Celebrations often mean lots of sugar and there are some healthy treat options out there. Healthy treating means serving a good variety of food that is more nutritious along with smaller amounts of higher sugar, higher fat treats.

From veggies and dip to chocolate angel food cupcakes, there can be a place for a sweet treat.

Here are some ideas:

• Small juice boxes (200 ml)
• Water
• Chocolate Milk
• Fruit and Veggie Plate with Yogurt Dip
• Yogurt tubes
• Milk puddings
• Popcorn
• Pita chips and Salsa
• Baked chips – small
• Mini carrot or fruit muffins
• Fruit skewers
• Sorbet
• Fruit Smoothies
• Chocolate Angel Food Cupcakes * see recipe section

For some more ‘healthy baked good ideas’ download “Bake Better Bites” at: http://www.healthyeatingatschool.ca/category/resources/
Foods to Avoid in children, youth and family programs

The following list has been prepared to help care providers, program coordinators, parents and youth understand what cannot be served in program settings. When snacks and lunches are sent in lunch kits many schools will put foods that cannot be served aside and will send home with the child at the end of the day.

The following beverages and foods should not appear as part of a meal or snack program in children, youth or family programs.

**Beverages**

Artificial sweetened and sugar beverages including:

- Soft drinks,
- sports drinks,
- energy drinks, and drinks containing caffeine
- punches,
- iced teas
- fruit crystal drinks such as tang
- fruit based drinks with less than 50% real juice (including Sunny Delight)
- slushy drinks

**Food and Snack Items**

- Pre-sweetened breakfast cereals
- Candy
- Chocolate Bars
- Pastries, donuts, danishes
- Dipped granola bars
- Fruit snacks with sugar as main ingredient
- Popcorn (choking hazard)
- Sticky buns
- Gum
- Frozen ice treats
- Instant noodle or packaged noodle soups
- Potato chips
- Flavoured cheese puffs (Cheezies)
- Lunchmates
- Pizza pockets
- Pizza topped with four cheese or meat lovers (processed meat)
- Fast Food – excluding 6 inch or smaller subway sandwich made with lean meat
### Meal Ideas

#### Breakfast

- 1 Whole wheat Mini bagel with peanut butter
- 1 Whole wheat Mini bagel with cheese
- 1 slice of whole grain bread with peanut butter
- 1 slice of whole grain bread with cheese
- 1 boiled or scrambled egg and 1 slice of toast
- 1 Slice of lean ham with 1 boiled egg and 1 slice of toast
- 1 slice of French toast
- 1 Whole grain waffles
- ½ to ¾ cup of unsweetened cereal with 1% or 2% milk
- ½ to ¾ cup of cream of wheat or oatmeal with 1% or 2% milk

#### Serve breakfast with one of these

- Piece of fresh or canned fruit
- ½ cup of vegetable juice
- ½ cup of yogurt (plain or with fruit)
- ½ cup of 1-2% milk

#### And offer 1-2 of these condiments for additional flavour on breakfasts

- Up to ½ tsp salt
- Up to 2 tsp of butter or non-hydrogenated margarine
- Up to 1 tsp pepper
- Up to 2 tbsp jam
- Up to 1 tbsp brown sugar or maple syrup
- Up to 2 tbsp ketchup, mustard
<table>

<td></td>
</tr>
</tbody>
</table>

**Serve one of the cold or hot lunch ideas with one of these:**

- Cold vegetables and dip
- Soup
- Salad
- Piece of fresh or canned fruit
- Applesauce
- Homemade pudding
- Nuts and raisins
- Banana bread
- Granola bar
- Cheese cubes
- Homemade oatmeal cookies
- Yogurt (plain or with fruit)

**Add one of the following beverages:**

- Water
- ½ to 1 cup milk (plain or chocolate)
Snack Ideas for Children in a Child-care Setting

- Apple with cheese and whole wheat crackers
- ½ mini bagel with light cream cheese and grapes
- Graham crackers and applesauce and water
- Banana and milk
- Mixed fruit and cottage cheese
- Yogurt
- Low fat carrot bran muffins
- Fresh or canned piece of fruit
- Raw vegetables and breadsticks with low fat dip
- Tortilla chips and yogurt
- Peanut butter and crackers

Sample Menu Plan

Here are some weekly snack and meal rotations that can be used to assist in planning snacks or meals. Look through the Healthy Food Guidelines and Meal Ideas for more options to make your own sample snack or meal plan for a week

Fundraising

For more ideas on Fundraising, see “Healthy Fundraising for Schools: a practical guide for parents and educators available in the resources section at www.healthyeatingatschool.ca

Foods that can fit as possible choices for Fundraising and Canteens:

**Beverages**

1. 100% fruit juice boxes (125 to 250 ml)
2. Sparkly juice drinks with “no added sugar” (125 to 250 ml) (How do you identify these?)
3. Fruit smoothies (125 to 250 ml)
4. Lower-sodium tomato and vegetable juices (125 to 250 ml)
5. 2%, 1% or skim flavoured or plain milk (125 to 250 ml)
6. Soy based fortified beverages (125 to 250 ml)

**Snack Items**

1. Raw vegetables and dip
2. Pieces of fruit
3. Frozen fruit bars
4. Cheese strings or cheese slices
5. Plain or flavoured yogurt
6. Granola or cereal bars that are not dipped and less than 2 ounces (56 g)
7. Small portions of frozen yogurt, sherbert, ice cream (up to ½ cup)
8. Puddings with less than 20 g of sugar n 175 ml
9. Mini Bagels (whole wheat)
10. Low fat baked loaves and muffins that are less than 3 inches in diameter or 85 grams in weight

**Entrees**

1. Subway style sandwiches less than 6 inches
2. Hot dogs that contain low sodium lean wieners with less than 12 g of fat in a 60 gram portion
3. Veggie topped pizzas
4. Falafels
5. Beef and bean burritos
6. Most sandwiches that are up to 6 inches in length
7. Stews, chilis, curries
8. Most pastas with vegetable and meat based sauce

See table “Foods that Fit on the Community Table” for more ideas of what can fit
Steer away from these items for sale in Schools for Fundraising

**Beverages**

1. Soft drinks, sports drinks, energy drinks, punches, iced teas
2. Fruit based drinks that have less than 50% real juice such as blends, cocktails, splashes and beverages that are sweetened with sugar
3. Fruit based drinks greater than 250 ml
4. Drinks containing caffeine
5. Slushy drinks
6. Juice drinks with added caffeine, artificial sweetener, guarana or yerba

**Snack Items**

1. Candy
2. Chocolate Bars
3. Dipped granola bars
4. Ice cream greater than ½ cup portion size
5. Fruit with a sugar based coating (e.g., yogurt- or chocolate- covered raisins)
6. Dried fruit (e.g., fruit roll-ups/leathers/chips) or fruit juice snacks (e.g., gummies)
7. Regular potato/vegetable chips
8. Most regular wiener, sausages, smokies, bratwurst
9. Most Pepperoni/chicken sticks

**Entrees**

1. Sandwiches with deli or processed meats
2. Subway style sandwiches greater than 6 inches
3. Some pizzas (4 cheese/double cheese, meat lover)
4. Pizza pockets
### Alternative door-to-door fundraising ideas:

- School supplies
- School T-shirts
- Greeting cards
- Fabric lunch bags or tote bags
- Flowers, potted plants, seeds or bulbs
- Household items (aluminum foil, garbage bags, plastic wrap, gift paper)
- Recipe books (containing healthy recipes donated by parents and community members)
- Cheese
- Citrus Fruit
- Vegetables
- Other bulk food
- Spices
- Loonie auctions with health promoting gift baskets and a nutritious dinner.

### Alternative Raffle Item suggestions:

- Barbeques
- Bike and helmet
- Boxes containing healthy food
- Treadmill
- Sports Equipment
- Cooking kit
- Healthy Foods Gift Baskets
- Swim passes at the local recreation centre

### TOOLS:

*Healthy Fundraising for Schools, a practical guide for parents and educators*

Website [http://www.dashbc.ca/](http://www.dashbc.ca/)
Creating a Nutrition Policy

To reinforce healthy eating, schools and community programs can find it helpful to create a nutrition policy for staff, parents and students that will serve as a reminder of the actions that need to occur in order to ensure that healthy food choices are available and back up the promotion of healthy eating. Policies are best accepted when everyone is brought on board for the creation of the policy and is in agreement with it.

Here is a sample nutrition policy that can be modified to suit your community needs

Sample Nutrition Policy

Our school has adopted the following nutrition policy:

Rationale

Children who go to school hungry or have a diet lacking in good nutrition are less likely to do well in school as hunger, tiredness, or weakness make it difficult to concentrate. Aboriginal children are at risk for inadequate intakes of vitamin D and iron. Foods that are high in fat, sugar and salt (junk food) are very poor sources of the nutrients needed for healthy growth and development and can block absorption of needed nutrients. Almost every day of the week children spend almost half of their waking hours in school. School can have an important influence on the development of healthy eating and physical activity habits.

Healthy Meal and Snack Programs

- Meals and snacks provided in our school will follow a healthy eating pattern based on Canada's Food Guide
- Our school will keep a tuck cupboard with healthy food choices and distribute food to children who do not have an adequate snack or lunch
- We will provide breakfast for children who arrive hungry at school. The breakfast will follow the healthy meal pattern.
- We will implement a healthy fruit and vegetable snack at least once a week.

Healthy Eating Environment

- Children will have 20 minutes to eat lunch
- Lunch will occur after playground time (1/2 hour)

Support for Healthy Eating

- Staff will be encouraged to model healthy eating
- Nutritious foods will be promoted for fundraising
- Healthy foods will be provided at meetings, community events
- Healthy food choices will be promoted and access to unhealthy foods and beverages will be limited on school property
Foods served to children

Fruits and Vegetables

- School meal or snack programs will include at least 1 serving
- Fruits and vegetables will come from the “Great on the Table Anytime” list
- Vegetables will be prepared either fresh or cooked using a low-fat cooking method (steamed, boiled, roasted or lightly stir-fried)
- The serving size will follow the maximum portion size guidelines

Grains

- School meal or snack programs will include at least 1 serving
- Grains will come from the “Great on the Table Anytime” list
- The serving size will follow the portion size guidelines and children will be encouraged to follow their own cues for hunger and fullness.

Milk and Alternates

- School meal or snack programs will include at least 1 serving
- Choices will come from the “Great on the Table Anytime” list.
- The serving size will follow the maximum portion size guidelines

Meat and Alternates

- School meal or snack programs will include at least 1 serving
- Choices will come from the “Great on the Table Anytime” list.
- Beans and lean meats or fish will be a daily choice in a regular meal or snack program.
- The serving size will follow the maximum portion size guidelines
- Traditional foods offered in school will have been handled and prepared in a foodsafe manner.
**High Fat Foods -** A High Fat Meal or Snack can be offered up to three times per month and may include:

- Fried meats or fish
- High fat meats (sausage, hot dogs, luncheon meats)
- Potatoes that are prepared and fried (French fries, tater tots, hashbrowns), in a portion size no greater than 4 oz or ½ cup.
- The portion size of high fat foods for children will be limited to ½ cup

**Beverages**

- Drinking water will be made freely available
- Water fountains will be maintained and in good working condition
- Sugar sweetened beverages such as pop, sports drinks and fruit juice will not be served.
- Artificially sweetened beverages will not be served

**Foods brought from home**

- Sugar sweetened beverages (pop, sports drinks) will be set aside and sent home after school.
- Candy will be confiscated.
- Chips will be confiscated.

💡 **Ways to Help your Body**

- Include meat and meat alternatives at meals
- Keep pre-packaged meats --cold cuts and deli meat, sausages, smokies, pepperoni/chicken sticks-- that are high in salt (sodium) and fat off the table
- Enjoy milk and milk alternatives every day
Section 5. Serving Healthy Food at Meetings and Conferences

What follows is a guide to help you work with caterers and make healthy food decisions for meetings.

Tips for Ordering

1. Portions
   - Refer to the Menu Models in Section 3 – Meal Buffet Ideas for Meetings and Community Events.
   - Offer smaller portions (e.g. mini bagels and muffins/sandwiches cut in half)
   - If breakfast is offered, consider offering only beverages at mid-morning energy breaks. Keep mid afternoon energy breaks light by offering vegetables, fruits, and raw nuts. This will help to reduce the overeating that we do at meetings. Encourage folks to get some fresh air and go for a quick walk if time permits.
   - Keep portions down by using 8 oz cups, glasses, bowls and 6 to 9 inch plates (lunch and dinner).

2. Healthier Food Choices
   - Include at least one vegetable and/or fruit, at each meal or snack
   - Serve whole grain products
   - Use cooking methods like roasting, baking, broiling, steaming, boiling, stir-frying, poaching that require little or no added fat rather than frying
   - Keep luncheon meats, sausages, pre-packaged meats off the table
   - Choose lower fat/calorie entrees, snacks and desserts
   - Serve fish and meat alternatives like white and black beans, lentils, baked beans

3. Condiments
   - Serve lower fat dips, sauces and spreads and provide them on the side (or not at all)
4. Beverages

• Serve water, plain or sparkling rather than juice or pop. Consider switching to herbal teas for the mid-afternoon energy break. Have low fat milk available for coffee.

5. Timing of meals

• Some of your meeting participants who have diabetes may be taking medications to control blood sugars. It is important to plan for snacks when meals are scheduled to be longer than 4 hours apart. It is also important to honour the schedule of the meeting agenda and have meals at the stated times.

For more ideas of what to serve at meetings and conferences look through the Healthy Food Guidelines and Making the Meeting Menu Healthier.

## Quick Lunch Ideas

### Light Meal Soups

Choose one or more of the soups listed and pair with a sandwich, bun, tortilla wrap or pita or as the start to a hot meal.

**SOUPS**
- President’s Choice Blue Menu Instant Soups such as Barley Vegetable, Spicy Thai with Vegetables
- President’s Choice Blue Menu Ready-to-Serve Serve Lentil Soup
- President’s Choice Blue Menu Instant Low Fat Vegetarian Chili Or President’s Choice Blue Menu Vegetable Couscous
- Campbell’s Ready to Enjoy Healthy Request Italian Style Minestrone or Vegetable Beef with Barley
- Healthy Choice Beef Pot Roast or Country Vegetable (bowl)
- Imagine Foods Tomato Soup (bowl)
- Nile Spice Sweet Corn Chowder (soup mix)
- Campbell’s Ready to Enjoy Healthy Request New England Clam Chowder

These soups are also great with low-fat cheese and the following whole grain crackers:
- Christie Triscuits Crackers – Original
- Christie Original Wheat Thins Crackers
- Dare Breton Crackers - Garden Vegetable

### Heat and Serve Timesavers

Try offering one of the following frozen entrées at your meeting and combine with some of the ideas above for a nutritious, balanced lunch.

**QUICK MEALS**
- Amy’s Bean & Cheese Burrito or Vegetable Lasagna
- Compliments Multigrain thin crust pizza – Chicken and Vegetable or Roasted Vegetable or Compliments Hawaiian Pizza
- Compliments Thin Crust Pizza – Italian Deli Style, 5 Vegetable or Chicken, Red Pepper & Sundried Tomato
- Lucerne Foods Eating Right Italian Chicken Lasagna
- President’s Choice No Name Spaghetti Bolognese
- President’s Choice Blue Menu 100% Whole Wheat Rotini with Chicken Pesto or Linguine with Shrimp Marinara
- President’s Choice Blue Menu Reduced Fat Chicken Lasagna
- President’s Choice Blue Menu Chicken Tikka Masala
- President’s Choice Blue Menu Lasagna Splendido,
- Stouffer’s Lean Cuisine Shrimp in a Creamy Seafood Sauce
- Stouffer’s Lean Cuisine Thai Chicken with brown rice, vegetables
- Stouffer’s Lean Cuisine Wild Salmon with Basil
- Weight Watchers Smart Ones Ravioli Florentine
- Yves Veggie Cuisine Veggie Lasagna or Veggie Penne

### Beverages

- Pitchers of plain or carbonated water with no sugar
- Coffee and an assortment of tea (black, green, herbal) with low fat milk or canned milk or powdered skim milk for coffee
- Low fat soy milk or skim milk
Section 6. Serving Traditional Food

Community tables used to be bursting with traditional foods. Main foods included game, birds, fish, shellfish, roots and greens. The dessert and sweetness was contributed by berries which held a very high status and were central. Today, berries have been replaced by cakes and pies.

The reasons for the change in use of traditional foods in our communities are complex and different for everyone. Climate change, employment, lack of time, amount of time needed to harvest and process foods, loss of knowledge about correct harvesting and processing, distance to travel to sites, loss of harvesting areas, decrease in numbers of fish, shellfish, and wild game, and concerns over pollutions are some of the concerns of hunters, fishers, and gatherers.

Many communities are finding unique solutions: restoring the teachings between elders and youth with respect to food harvesting; planting traditional berries and other important plants in the backyard, on reserve, in a community garden or negotiating land use management plans with other levels of government and the private sector are part of the solution.

Story:

Over the past 100 years, many people have settled on the eastern side of Vancouver Island. With little places to hunt and harvest berries, the creation of the Gulf Island Park Reserve presented a unique opportunity for First Nations to enter into harvesting agreements with Parks Canada. Today, at certain times in the Year, Parks Canada restricts access to part of the National Parks to First Nations to allow communities to hunt, fish and harvest plants.
Tips for Food Safety—Serving Traditional Food at Community Events and Meetings

If you are using traditional foods for community events

- Use proper food-handling techniques. Provide harvesters and cooks with the opportunity to receive FoodSafe training. Environmental health officers provide training
- Know your source of food (who handled it and how)
- Restrict this to food sources that you know are safe (keep it limited because of spoilage, handling, processing)
- Advise parents (so they are aware of what their child is eating)
- Prepare the food on-site in an inspected kitchen
- Use common sense (make sure the food is in good condition, doesn’t have a rancid or fermented smell, is a good colour. Decide if you think it is safe to eat it yourself or to serve to your own child. If you don’t know—don’t serve it).

💡 Tips for preparing a community feast

- Include dark green vegetables or orange vegetables on the table
- Keep fried foods off the table
- Use smaller size plates, bowls, cups and glasses
- Select foods that are produced and gathered locally more often
- Offer some dishes with beans, lentils or other legumes
Foodborne Bacteria and Game

Salmonella and Escherichia coli, can be found on raw or undercooked game. They live in the intestinal tracts of game, livestock, poultry, dogs, cats, and other warm-blooded animals, and must be eaten to cause illness. Foodborne bacteria cannot enter the body through a skin cut. Bacteria multiply rapidly in the “Danger Zone”— temperatures between 40 and 140 °F. Cross-contamination can occur if raw meat or its juices come in contact with cooked foods or foods that will be eaten raw, such as salad.

Freezing does not kill bacteria. Cooking to 160 °F kills bacteria.

Handling Game Safely

All animal protein foods including game, fish, birds and seafood provide some level of risk with respect to food borne disease. This makes proper food handling practices extremely important. Traditional methods of hunting and gathering were generally quite strict to ensure that the food remained healthy. As some aspects of hunting or gathering may have changed with modernization, the following are some general food safety guidelines to ensure that the risk of food borne disease is minimized.

Dressing:

Eviscerate the animal within an hour of harvesting.

Storage while transporting:

Put in disposable plastic bag (if available) to contain any leakage and prevent cross-contamination

Long Term Storage-Refrigeration and Freezing

-Refrigerate within a few hours of harvesting. In fridge, Place on lower part of fridge.

-Refrigerate game immediately at 40 °F or below.

-Cook or freeze (0 °F) game birds and ground game within 1 or 2 days; game animals, within 3 to 5 days. If kept frozen continuously, use within 1 year for optimal nutritional value, 6 months for fish).
Safe Defrosting

Defrost frozen game: in the refrigerator, in cold water, and in the microwave.

Never defrost on the counter.

**In the refrigerator**- Whole birds or ground meat may take 1 to 2 days or longer to defrost in the refrigerator; roasts, several days. Once the raw poultry defrosts, it will be safe in the refrigerator an additional day or two before cooking. Meat and poultry thawed in the refrigerator may be safely refrozen without cooking it first.

**In cold water**- Keep packaging on and make sure it is airtight or put it in a leak-proof bag. Submerge the product in cold water, changing the water every 30 minutes. A whole bird (3 to 4 pounds) or package of parts should defrost in 2 to 3 hours; larger amounts may take 4 to 6 hours.

**Microwave-defrosting**- Defrost and cook immediately after thawing as some parts may start to cook during microwaving. Holding partially-cooked food is not recommended because any bacteria present would not have been destroyed.

Partial Cooking

Never brown or partially cook game to refrigerate and finish cooking later because any bacteria present would not have been destroyed. It is safe to partially pre-cook or microwave game immediately before transferring it to a hot grill or other cooking appliance to finish cooking.

💡 Ways to Help your Body

- Take the time to harvest traditional foods with your family
- Choose water as a thirst quencher
Handling Seafood Safely

After harvesting or buying seafood, how you cook and store your food, and how you treat it in between, can help prevent illness.

Storage

Until Home - Keep in a cooler on plenty of ice to keep seafood cool if they won’t be refrigerated or cooked for more than 2 hours (1 hour in hot weather).

At Home - Keep seafood in the lower area of the refrigerator, below cooked or other ready to eat food until cooking. Freeze shellfish whole or shucked.

Fish - Keep fresh fish in a glass container (if there is a plastic wrapping, remove as soon as you get home). Cover loosely and refrigerate.

Shellfish - Keep live shellfish in leak-proof containers that allow them to breathe. Cover live shellfish in damp towels. THROW AWAY ANY SHELLFISH THAT DIE DURING STORAGE (THE SHELLS WILL REMAIN OPEN – A LIVE SHELLFISH WILL CLOSE UP IF TOUCHED)
Storage Times

Fish

**Fresh:** Use as soon as possible. Fish usually should be cooked within 48 hours.

**Frozen:** Frozen fish can keep in a chest freezer for up to 6 months without much nutrient loss. If fish is kept frozen in the freezer section of a refrigerator, it’s good for about 3 months. (CHECK)

Shellfish - Keep shellfish stored at 4ºC or less

**Raw (in the shell):** Use clams and mussels within 3 days and oysters within 7-10 days. Discard any that die

**Raw (shucked):** Use clams and mussels within 2 days and oysters within 7 days.

**Cooked:** Use cooked shellfish within 3 days.

**Frozen:** Use frozen shellfish within 3 to 6 months.

Throw away food held at room temperature (more than 4ºC or 40ºF) for more than 2 hours
Cooking Shellfish

Proper cooking is the easiest way to prevent illness from eating shellfish that are contaminated by bacteria and viruses.

In the shell:

After the water begins to boil, cook for another 3-5 minutes after the shells begin to open. Do not cook too many in the same pot because the clams and mussels in the middle may not get fully cooked.

On the Barbeque or over a fire:

Make sure that you bake the oysters until the shells open by themselves. Cook for 2-3 minutes longer after the shells have opened.

Shucked:

Boil or simmer for at least 3 minutes until they become plump and white. The edges of oysters should curl slightly. Fry at 375 degrees for at least 3 minutes. Broil 3 inches from heat for 3 minutes. Bake at 450 degrees for 10 minutes.
Fish Tips

Buying Fresh Fish

1. Fish should smell clean and fresh, never “fishy”
2. If the fish is whole, eyes should be clear and protruding. The gills should be red, and the skin should feel moist and smooth.
3. Flesh should feel firm when you press it.
4. After you get the fish home and unwrap it…if it smells after 1 hour in the fridge, return it.
5. Use fresh fish within a day

Frozen Fish

1. If ice has formed on one side, the fish has probably defrosted and frozen again.
2. Use defrosted fish quickly
3. Thaw frozen fish safely in the refrigerator. Thawing fish at room temperature allows bacteria to grow on the outside. Thawing fish in hot water causes a loss of tissue moisture, texture changes and flavour loss as it ‘cooks’ the fish.

💡 Ways to Help your Body

- Have fish at least 2 times a week
- Limit fat, saturated fat, trans fat, sugar and salt.
- Serve vegetable protein like tofu, and beans—white, black, kidney, chickpeas, lentils in meals
Section 7. Improving Local Food Security-Increasing the Use of Local and Regional Foods

Why serve BC grown foods?

Buying foods grown locally (within 50 km of the place they are sold), regionally and within British Columbia helps reduce greenhouse gas emissions. Most ingredients in our foods travel, on average about 1500 km.

Buying BC grown foods is an affirmation of our support for the continued use of agricultural land, family farms and food security in British Columbia.

Local food can be fresher. Food produced locally can be picked at the peak of ripeness. Foods from far away have to be picked early and ripened artificially. They may also have more pesticides, waxes added to sustain the transportation process.

Local foods can be more affordable and supports the local economy. The further the food travels, the more the cost for transportation.

How can we increase our support and use of local food?

Actions for communities:

1. Make community harvesting, gleaning and preserving activities part of school, youth and health program activities
2. Promote gardening programs in school or in the community as a way to improve access to local food.
3. Shop preferentially for fresh food at a farmer's market.
4. Go to the BC Specialty Food Directory for a listing of BC food retailers in your region
5. Review the Colour it Up chart in the appendix to find out what food is available seasonally
6. Find out about growing and business opportunities through the First Nations Agricultural Association and First Nations business associations.

Matsqui First Nation have established a successful horticulture enterprise, producing field and greenhouse vegetables for elders and for sale to the local community.

http://www.al.gov.bc.ca/Agriculture_Plan/4_fn_agcapacity.html
For a listing of where you can buy local foods, check out:

**BC Farmer’s Markets-Markets Listing**

http://www.bcfarmersmarket.org/directory/index.htm

**Small Scale Food Processor Association**

The vision of the Small Scale Food Processor Association (SSFPA) is to help create regional food sustainability.

💡 **Ways to Help your Body**

- Buy local foods in season
- Join a good food box or food coop
- Plant some vegetables and berry bushes
Some recipes are provided here to assist in making healthier community meals. These recipes make 25-50 servings.

### Vegetable Side Dishes, Salads

#### Oven Roasted Brussel Sprouts (serves 35ppl)

**Ingredients**

- 7.5 pounds Brussels sprouts, ends trimmed and yellow leaves removed
- 1/2 cup vegetable oil
- 1/2 tablespoon salt
- 1 tablespoon thyme
- 1 tablespoon ground black pepper

**Method of preparation**

1. Preheat oven to 400F
2. Toss Brussels sprouts with oil, salt, pepper and thyme
3. Bake in oven for 30-45 minutes until internal temperature reaches 74C, stir every 5-7 minutes to ensure even browning
Oven Roasted Vegetable (serves 30ppl)

**Ingredients**

- 2 small butternut squash, cubed
- 5 red bell peppers, seeded and diced
- 2-1/2 sweet potato, peeled and cubed
- 4 large zucchini, diced
- 2 onion, quartered
- 1.5 tablespoons dried thyme
- 2.5 tablespoon dried rosemary
- 1/2 cup canola or olive oil
- 1/4 cup balsamic vinegar
- Salt and freshly ground black pepper

**Methods:**

1. Preheat oven to 475 degrees F (245 degrees C).
2. In a large bowl, combine the squash, red bell peppers, sweet potato, and Yukon Gold potatoes. Separate the red onion quarters into pieces, and add them to the mixture.
3. In a small bowl, stir together thyme, rosemary, olive oil, vinegar, salt, and pepper. Toss with vegetables until they are coated. Spread evenly on a large roasting pan.
4. Roast for 35 to 40 minutes in the preheated oven, stirring every 10 minutes, until vegetables reach an internal temperature of 74C

* you can substitute with any seasonal vegetable, ensure to include a variety of colours

* substitute wine vinegar for balsamic vinegar

Honey Glazed Snap Peas and Carrot (serves 30ppl)

**Ingredients**

- 4 lb sliced carrots (about 12 large carrots)
- 2-1/2 pounds snow peas, trimmed
- ¼ cup vegetable oil
- ¼ cup water
- 2-1/2 teaspoons cornstarch
- 1/2 cup honey

**Methods:**

1. Bring a large saucepan of salted water to a boil. Add carrots and cook until tender crisp, 10 to 12 minutes. Add pea pods and cook until tender crisp; drain and set aside.
2. Combine water, oil and cornstarch in a large pan. Toss in carrots and peas until evenly coated. Stir in honey. Cook over medium heat, stirring occasionally, until heated through and internal temperature reaches 74C.

Green Salad (serves 30ppl)

**Ingredients**

- 5 pounds mixed salad greens
- 5 cups Seasonal berries
- 2-1/2 red onion, thinly sliced
- 5 cup sliced almonds, toasted

**Methods**

Toss salad green, sliced almonds and red onion together. Lightly toss in seasonal berries. Serve with dressing on the side.
Cranberry Vinaigrette (serves 30-35 ppl)

Ingredients

- 3/4 cup red wine vinegar
- 1-2/3 cups olive or vegetable oil
- 1-1/4 cups fresh cranberries or other seasonal berries
- 1/4 cup Dijon mustard
- 2 cloves minced garlic
- 2 teaspoons salt
- 2-1/2 teaspoons ground black pepper
- 1/2 cup water

Method

Put all ingredients in a food processor or blender. Process until smooth.

Raspberry Vinaigrette (serves 30ppl)

Ingredients

- 1-1/4 cups vegetable oil
- 1-1/4 cups raspberry wine vinegar
- 1/2 cups white sugar
- 2-1/2 tablespoon Dijon mustard
- 1/2 teaspoon dried oregano
- 1/2 teaspoon ground black pepper

Method:

Put all ingredients in a food processor or blender. Process until smooth.
Greek Salad (serves 30-35ppl)

Ingredients

- 5 heads romaine lettuce- rinsed, dried and chopped
- 5 red onion, thinly sliced
- 2 (14 ounce) cans pitted black olives
- 5 green bell pepper, chopped
- 5 red bell pepper, chopped
- 10 large tomatoes, chopped
- 5 cucumber, sliced
- 2 1/2 cups crumbled feta cheese
- 1-3/4 cups olive oil
- 1-1/2 tablespoon dried oregano
- ½ cup lemon juice
- ground black pepper to taste

Methods:

1. In a large salad bowl, combine the Romaine, onion, olives, bell peppers, tomatoes, cucumber and cheese.
2. Whisk together the olive oil, oregano, lemon juice and black pepper. Pour dressing over salad, toss and serve.

Lower Fat Coleslaw (for 50 ppl)

Ingredients

• 25 cups of cabbage grated (about 6 heads, mix green and purple or add savoy)
• 12 carrots, grated
• 3 purple onions
• 12 apples
• 1.5 cups sunflower seeds
• 3 cups celery
• 2 red peppers (optional-for colour)

Dressing:

• 3 cups low fat plain yogurt
• 3 cups light mayonnaise
• 1 cup apple cider vinegar
• 1/3 cup honey
• 1 tbsp salt and pepper

Methods

1. Mix together yogurt, mayonnaise, apple cider vinegar, honey, salt and pepper.
2. Combine all other ingredients
3. Toss with half the dressing and add more if needed. Season with salt and pepper.
Grains and Starches

Bannock (serves 25-30 ppl-2” by 2” by 1” servings)

Ingredients

• 3 cups (750 ml) whole wheat flour
• 3 cups (750ml) of all purpose flour
• 1 cup (250 ml) oatmeal
• 3 tbsp (45 ml) baking powder
• ½ cup (120 ml) vegetable oil
• ½ cup (120 ml) skim milk powder
• 3 cups (750) water

Methods:

1. Preheat oven to 375F
2. In a large bowl, mix together flour, baking powder and powdered milk
3. Blend in vegetable oil until mixture looks crumbly
4. Add water and mix thoroughly. If dough is too dry, add more water.
5. Put into 2 large pans and pat out. Prick all over with a fork.
6. Bake at 375 F for about 45 minutes.
Winter Hash (Serves 30ppl)

Ingredients

- 1/2 cup vegetable oil
- 5 pounds potatoes, diced
- 2-1/2 pounds fresh mushrooms, diced
- 5 red bell pepper, diced
- 5 small acorn squash, diced
- 2 onion, diced
- 4 tablespoons minced garlic
- 1 tsp salt
- 1 tsp ground black pepper
- 5 cups chopped kale
- 20 sprigs fresh sage or 3 tbsp dried sage

Methods:

1. Preheat oven to 425F
2. Mix minced garlic, salt, pepper, sage and vegetable oil together
3. Toss potato, onion, mushrooms, pepper, and squash with oil mixture and bake in oven for 30-40 minutes, until potatoes are softened. Stir occasionally.
4. Mix kale with vegetable mixture. Continue baking for another 10 minutes, until kale is wilted.
Potato Salad (serves 30ppl)

Ingredients

• 7-1/2 pounds red potatoes, unpeeled, cut into chunks
• 2-1/2 cups low-fat sour cream
• 1-1/4 cups light mayonnaise
• 1 tablespoon and 2 teaspoons Dijon mustard
• 2-1/2 teaspoons white vinegar
• 10 hard-cooked eggs, chopped
• 2-1/2 dill pickle, chopped finely
• 7/8 celery stalk, chopped
• 5 green onions, chopped
• 2-1/2 dashes hot sauce
• 2 tablespoons and 1-1/2 teaspoons dried dill weed
• 1-1/4 teaspoons garlic powder
• 5 tbsp red onion, chopped finely
• salt and pepper to taste

Methods:

1. Place the potatoes in a pot with enough water to cover. Bring to a boil, and cook for about 10 minutes, or until easily pierced with a fork. Drain, and transfer to a large bowl to cool.

2. In a medium bowl, mix the sour cream, mayonnaise, mustard, vinegar, eggs, pickle, celery, green onions, and hot sauce. Season with dill, garlic powder, salt and pepper. Pour over the potatoes, and gently toss to coat. Chill at least 3 hours in the refrigerator before serving.

Corn and red pepper salad (serves 30 ppl)

Ingredients

- 7- 1/2 lb frozen corn kernels, thawed and drained
- 1/2 cup chopped green onions
- 2 large onions, diced
- 4 red peppers, diced
- ¼ cup oil
- 2 Tbsp paprika
- 1-1/2 Tbsp black pepper

Methods:

1. Mix corn kernels, chopped green onions, red peppers in a large bowl. Season with black pepper and paprika.
2. Sautee onions with oil. Turn down the heat and let caramelize for 5-10 minutes
3. Toss onions in with corn mixture. Serve cold or hot.
Whole wheat blueberry pancakes (serves 50 ppl)

Dry Ingredients:

- 12.5 cups whole wheat flour
- 2.5 cups white flour
- ½ cup baking powder
- 2 tbsp salt
- ½ cup sugar

Wet Ingredients:

- 10 cups milk (2.5 L)
- 10 eggs
- 5 cups (1.25 L) blueberries

Method:

1. Pre-heat grill or pancake griddle to 375 F.
2. Sift together flour and baking powder, set aside.
3. Beat together the egg, milk, salt and sugar in a bowl. Stir in flour until just moistened, add blueberries, and stir to incorporate.
4. Preheat a heavy-bottomed skillet over medium heat, and spray with cooking spray. Pour approximately 1/4 cup of the batter into the pan for each pancake. Cook until top is covered with bubbles, turn, cook on the other side. Continue cooking until golden brown.

Total time 3-4 minutes. 2 pancakes per serving.

Instead of milk try fortified soy or rice beverage.
Meat and alternatives

Scrambled Eggs (serves 50 ppl)

Ingredients

- 100 eggs
- 8 tsp salt
- 2.5 Litres (10 cups 1% milk)
- Vegetable oil

Method:

1. Beat eggs together for 2 minutes in a large non-aluminum pot (aluminum pots/pan can react with eggs and make them turn green).
2. Heat milk and salt.
3. Add eggs and butter to milk. Do not stir.
4. Pour into 2 large roasters that have been lightly coated with oil. Bake at 350 degrees for 20 minutes hour, stir. Add additional oil if required to prevent sticking.
5. Bake for 30 minutes stir and serve immediately.
Low fat-Salmon chowder (serves 50 ppl)

Ingredients

- 11.5 cups chicken broth
- 1/3 cup olive oil
- 6 onions, diced
- 2 fennel bulbs, trimmed and diced
- 12 carrots, peeled and diced
- Bulb garlic (12 cloves)
- 6 large russet potatoes, skin on, diced
- 8.5 cups frozen/canned corn
- 3 bay leafs
- 3 lbs (1.4 kg) of fresh salmon cut in half-inch pieces or canned salmon
- 11.5 cups of low-fat canned milk
- 1 tbsp salt
- 1 tbsp pepper
- 2 tbsp thyme or chive (optional)

Method:

1. Heat a large pot on medium high. Add the oil and stir in the vegetables
2. Add the bay leaf and broth and bring to a boil.
3. Cover, reduce, heat to medium and simmer until vegetables are done, about 25 minutes.
4. Stir in the fresh fish and cook for 25 minutes until the fish is thoroughly cooked. If adding canned salmon, the cooking time decreases.
5. Add the canned milk and let the soup heat up. Do not boil.
6. Add salt and pepper, thyme or chive
7. Serve
Bean recipes

Beans can be purchased in different varieties: dry packaged or bulk, canned in water, canned in sauce.

Beans are a great source of vegetable protein. Low in fat, they are healthy and economical. They are great with rice and pasta or mixed in with meat in chili, stews, soups and sauces to stretch your protein dollars further!

Not only are canned varieties more expensive as compared to dry beans, as with any prepared food, canned beans can be full of salt! If using canned beans in water, rinse well under cold running water before adding into recipe.

Dry beans are cheaper and easy to prepare if you remember to soak them overnight or use the quick boil method.

To prepare dry beans:

1. Long soak: Rinse and soak in plain water (no salt added) overnight before cooking. Use 3 cups of water for each cup.
2. Quick soak: Rinse and place in a large pot. Add 3 cups of water for each cup of beans. Bring to a boil. Let boil gently for 1 minute and remove pot from heat. Leave for an hour. Rinse and then cook.

To cook beans:

In a large sauce pan combine soaked beans and water, cover and bring to a full boil. Reduce heat and simmer until fork tender, about 45-60 minutes. Rinse. They are ready to be added into your recipes

💡 Cooked beans freezes well and can keep for up to 6 months. Why not cook off large quantities and pre portion into airtight containers.
Beans and Rice (serves 30 ppl)

Ingredients

- 5 medium onion, chopped
- 5 green pepper, chopped
- 6 medium tomatoes, chopped
- 2.5 tsp chili powder
- 2.5 tsp Worcestershire sauce
- 5 cup kidney bean, prepared and drained
- 5 cup rice, cooked
- 1.5 cup light cheddar cheese, shredded

Methods:

1. In a large saucepan, add onion, green pepper, tomatoes, chili powder and Worcestershire sauce. Bring to a boil over medium heat, reduce to simmer and let cook for 5 minutes. Stir once or twice to prevent sticking
2. Add kidney bean and cooked rice, stir gently to combine. Continue to cook for another 10 minutes and until internal temperature reaches 74C
3. Pour into serving pan and sprinkle cheese on top.

Adapted From “The low salt, low sugar, high fibre, low fat but big fun!!! Cookbook”. The Sioux lookout diabetes program, Sioux lookout Ontario.
Chicken Vegetable Soup (makes 30-35 svgs)

**Ingredients**

- 2 fresh chicken (6 lb)
- 7 L water
- 1 bunch celery, diced
- 3 large yellow onion, chopped
- 1 kg bag of frozen vegetable or assorted vegetable, diced
- 2 cans (28oz) diced tomato
- 1.5 cup dried barley
- 4 cloves garlic, minced
- 2 tsp rosemary
- 3 bay leaves
- 2 tsp thyme

**Methods:**

1. Place chicken and water in a large soup pot and bring to a boil. Reduce heat and simmer for 1.5-2 hours until the chicken is cooked and tender
2. Remove chicken from the broth. Skim any fat off from the surface.
3. Remove skins and bones from the chicken. Cut into small bite size pieces and return to the pot.
4. Add remaining ingredients to the broth.
5. Cover and simmer for 30 minutes and until internal temperature of the soup reaches 74°C.
6. Remove bay leave before serving.
Lentil Soup (serves 30 ppl)

Ingredients

- 6 cups (500mL) split red lentils, rinsed
- 32 cups (6 L) low sodium chicken stock or vegetable stock
- 6 medium onions, chopped
- 3 medium tomato, chopped
- 3 medium carrot, chopped
- 1/3 cup olive oil
- 1/3 cup lemon juice
- 2 tbsp cumin
- 1-1/2 tsp pepper

Methods:

1. Wash lentils in a strainer.
2. Put stock into a 4 to 5 quart (4 to 5 L) pot and bring it to a boil.
3. Set aside 2 Tbsp (30 mL) of the chopped onion.
4. Add the remaining onions, carrot, tomato and lentils to the stock. Lower the heat to simmer, and cook for about 1/2 hour or until the lentils are tender.
5. Puree the mixture in either a food processor or a blender, and return it to the pot.
6. Cook the 2 Tbsp (30 mL) of chopped onion in the olive oil until they are soft and brown.
7. Add the cooked onions, cumin, lemon juice, salt and pepper to the stock pot. Stir slowly over low heat for about 3 minutes, then serve.

Chili (serves 35-40 ppl)

Ingredients

- 12 cups Kidney beans, cooked, rinsed
- 4 Tbsp vegetable oil
- 8 medium onion, sliced
- 4 medium green pepper
- 3 stalks of celery
- 6 lb of lean ground meat (beef, moose, etc)- browned and drained
- 4 cans (28oz) diced tomato- salt free
- 6 cans (5.5oz) tomato paste
- 1 tsp Tabasco sauce
- 2 tsp cumin
- 1 tsp coriander
- 2 tbsp chilli powder

Method

1. Fry onion, green pepper, celery in 4 tbsp vegetable oil until onions are transparent
2. Add ground meat. Brown until meat loses its pink colour
3. Drain off any excess fat.
4. Add tomatoes, tomato paste and seasoning.
5. Cover and simmer for 45 minutes
6. Add cooked beans and simmer for another 30 minutes until the internal temperature reaches 74C

From “The low salt, low sugar, high fibre, low fat but big fun!! Cookbook”. The Sioux lookout diabetes program, Sioux lookout Ontario.
Moose Stew (serve 30 ppl)

Ingredients

- 7.5 lb moose, caribou or beef, cubed
- 5 L beef broth, low sodium
- 3.5 cup water
- 10 cloves garlic, minced
- 4 turnip, peeled, cubed
- 5 medium potato, peeled, cubed
- 5 carrots, sliced
- 5 stalks celery sliced
- 5 large onion, chopped
- 6 tomatoes, cut up
- 5 can (110ml) tomato paste
- 2 Tbsp Worcestershire sauce
- 5 bay leaf
- 1-1/4 cup flour

Method:

1. In a large sauce pan bring moose, beef broth, water and garlic to a boil. Reduce heat, cover and let cook for 45 minutes.
2. Add turnip, potato, carrots, celery, and onion. Cook for 10-15 minutes or until vegetables are tender. Stir in tomatoes and tomato paste. Add Worcestershire sauce and bay leaf. Simmer 5 to 10 minutes or until meat is tender. Add pepper.
3. Mix flour and water to from a smooth paste. Stir in to the sauce and bring to a boil. Keep stirring until thickened. Test to ensure temperature reaches 74C before serving.

From “The low salt, low sugar, high fibre, low fat but big fun!!! Cookbook”. The Sioux lookout diabetes program, Sioux lookout Ontario.
Mooseburger Soup (serves 30 ppl)

Ingredients

- 4.5 lbs Ground Moose, Caribou, Elk, or Deer
- 3 Medium onions, chopped
- 3 28 oz cans Tomatoes, chopped
- 18 cups Beef broth or water
- 12 carrots, chopped
- 12 celery stocks, chopped
- 2 Bell pepper
- 1.5 cup Pot Barley
- 6 tbsp Parsley
- 3 tbsp Mrs. Dash (Salt-free) or other Salt-free seasoning

Methods

1. Brown meat and onions. Drain off excess fat
2. Combine all ingredients in a large pot. Bring to boil. Simmer, covered for at least 2 hours to make sure barley is cooked
3. Taste to adjust seasonings.

Fruits based desserts and baking

Bumbleberry Crisp (serves 35 ppl)

Ingredients

- 3 cups fresh blackberries
- 3 cups fresh raspberries
- 3 cups fresh blueberries
- 1 cup all-purpose flour
- 1 cup whole wheat flour
- 2 cups rolled oats
- 1 1/2 cups packed brown sugar
- 2 teaspoons ground cinnamon
- 1 teaspoon ground nutmeg
- 3/4 cup non-hydrogenated margarine

Methods:

1. Preheat oven to 350 degrees F (175 degrees C).
2. In a large bowl, gently toss together blackberries, raspberries, and blueberries set aside.
3. In a separate large bowl, combine flour, oats, brown sugar, cinnamon, and nutmeg. Cut in non-hydrogenated margarine until crumbly. Place berry mixture in a 9x13 inch pan. Sprinkle crumble mixture over the berries.
4. Bake in the preheated oven for 30 to 40 minutes, or until fruit is bubbly and topping is golden brown.
Chocolate Zucchini Bread (serves 45-50 ppl)

Ingredients

- 2 cups all-purpose flour
- 2 cup whole wheat flour
- 1/2 cup white sugar
- 1/2 cup brown sugar
- 1-1/2 cups unsweetened cocoa powder
- 1 tablespoon and 1 teaspoon baking soda
- 2 teaspoons baking powder
- 1 teaspoon salt
- 2 teaspoons ground cinnamon
- 8 eggs
- 1-1/2 cup vegetable oil
- 1- 1/2cup apple sauce
- 6 cups grated zucchini
- 1-1/2 cups chopped walnuts

Methods:

1. Preheat oven to 350 degrees F (175 degrees C). Grease and flour two 9x13 inch baking pan.
2. In a medium bowl, stir together the flour, sugar, cocoa, baking soda, baking powder, salt and cinnamon. Add the eggs and oil, mix well. Fold in the nuts and zucchini until they are evenly distributed. Pour into the prepared pan.
3. Bake for 50 to 60 minutes in the preheated oven, until a knife inserted into the center comes out clean. Cool cake completely before frosting with your favorite frosting.
Banana Nut Muffin (make 48 muffins)

Ingredients

- 4 cup white flour
- 4 cup whole wheat flour
- ½ cup sugar
- 2 tbsp baking powder
- 2 tsp baking soda
- 2 cup milk, skim or 1 %
- 4 tsp vinegar
- 5 large ripe banana
- 4 eggs
- 2 tbsp vanilla
- 1 cup yogurt, low fat plain
- ¼ cup canola oil
- 1 cup walnuts

Methods

1. Lightly grease muffin tin with cooking spray or line with paper cups
2. In a bowl, combine milk and vinegar with mashed banana, egg, vanilla, yogurt and oil
3. In another bowl, combine flour, sugar, baking powder, and baking soda. Make a well in the dry ingredients, pour in banana mixture and add nuts. Mix until dry ingredients are moistened
4. Fill muffin tins 2/3 full. Bake at 400F for 20 minutes or until lightly browned.
Blueberry Muffin (makes 36 muffins)

Ingredients

• 3-3/4 cups quick cooking oats
• 1.5 cups all-purpose flour
• 1.5 cup whole wheat flour
• 3/4 cup white sugar
• 3 tablespoons baking powder
• 1-1/2 teaspoons salt
• 3 cups milk, skim or 1%
• 3 egg
• 3/4 cup vegetable oil
• 5 cups blueberries, rinsed and drained

Methods

1. Combine oats, flour, sugar, baking powder, and salt. Mix in milk, egg, and oil; mix just until dry ingredients are moistened. Fold in blueberries. Fill greased muffin cups 2/3 full with batter.
2. Bake at 425 degrees F (220 degrees C) for 15 to 20 minutes.

Yogurt with fresh berries (serves 30ppl)

Ingredients

5 container (750ml) vanilla flavour yogurt, skim
10 lbs Seasonal berries

Method

1. Top yogurt with seasonal berries.
Mini Raspberry cheesecake (serves 25)

Ingredients

- 10 PEEK FREANS Lifestyle Selections Shortcake Biscuits, crushed
- 2-1/2 (250 g) packages Light Cream Cheese Spread
- 2-1/2 cups low-fat cottage cheese
- 1/3 cup and 2 tablespoons sugar
- 1/2 teaspoon vanilla
- 1/2 cup and 2 tablespoons light sour cream
- 2-1/2 teaspoons cornstarch
- 2-1/2 egg
- 1/4 cup and 1 tablespoon Raspberry Jam

Methods

1. Heat oven to 350 degrees F. Sprinkle biscuit crumbs evenly onto bottoms of a paper-lined mini cheesecake pan; set aside. Beat cream cheese, cottage cheese, sugar and vanilla in medium bowl with electric mixer until well blended. Add sour cream and cornstarch; mix well. Add egg; beat just until blended. Spoon evenly into prepared muffin cups.
2. Bake 30 min or until centres are almost set. Cool completely. Refrigerate at least 3 hours. Remove cheesecakes from pan just before serving; discard paper liners. Place cheesecakes on serving plate.
3. Microwave jam in microwaveable bowl on HIGH 25 sec. or just until warmed. Spoon over cheesecakes. Store leftovers in refrigerator.
CHOCOLATE ANGEL FOOD CUPCAKES

These cupcakes have just 37 calories.

- 1/3 cup sweetened cocoa powder
- 1/3 cup water
- 1/2 teaspoon vanilla extract
- 4 large egg whites
- 1 dash salt
- 1/3 cup granulated sugar
- 1/4 cup flour
- 2 teaspoons baking powder
- Nonstick cooking spray or paper baking cups
- 12 tiny strawberries or strawberry wedges (optional)

Preheat oven to 350 degrees.

In a small saucepan, stir cocoa and 1/3 cup water over low heat for about 1 minute until mixture thickens and just begins to boil. Remove from heat and stir in vanilla.

In a large bowl, with electric mixer at high speed, beat egg whites and salt until soft peaks form when beaters are lifted. Add sugar, 1 tablespoon at a time, beating well after each addition until stiff peaks form when beaters are lifted. Quickly add cocoa mixture and beat 20 seconds until just blended.

In a small bowl, combine flour and baking powder. Fold into egg white mixture, one quarter at a time.

Spray a 12-cup muffin pan with vegetable cooking spray or line with paper baking cups. Divide batter between cups. Bake 10 to 15 minutes until cupcakes begin to pull away from the sides of the pan. Remove from oven and cool on wire rack for 10 minutes. If baked directly in the pan, run a knife around the edge of cupcake to loosen.

Garnish each with a little whipped cream and a strawberry, if desired.

Makes 12 cupcakes.

</table>
Natural health products (NHPs) are not permitted for sale in BC schools. NHPs are not regulated as food under Canada's Food and Drug Regulations. They are similar to medications in that they are intended to be consumed for specific conditions and in limited doses.

Examples of NHPs:
- Some vitamin and mineral enhanced beverages
- Some protein powders

Currently many of the food and beverage products previously regulated as Natural Health Products (e.g. caffeinated energy drinks, vitamin and mineral waters) are being transitioned into the Food and Drug Regulations. As part of this transition, Health Canada is collecting market and consumer use data on these products, which will inform future amendments to the Food and Drug Regulations. These amendments will set minimum and maximum amounts for added vitamins, minerals and other active ingredients and establish labelling requirements for these types of products. As a precautionary step, products that include any of the following pieces of information on the label are not permitted for sale in BC schools:
  - Cautionary or warning statements (e.g., “Do not consume more than ‘X’ servings daily”, “Use ‘X’ servings maximum daily”, “Not recommended for children”).
  - A declared amount of a botanical or herbal ingredient (e.g. ‘X’ mg Energy Blend, ginseng, ginkgo biloba, milk thistle, guarana seed extract, grape skin extract, or Coenzyme Q10).

Three ways to identify a Natural Health Product:
1. Look for a NPN/DIN-HM or EN number on the package
2. Look for the words Recommended Dose, Medicinal Ingredients and Non-medicinal Ingredients on the package.
3. Search for the product in the Licensed Natural Health Products Database.
Appendix 2. Preparing Food Safely

Safe Handling

1. Tie your hair back or wear a hat.
2. Pull up sleeves to prevent your clothes from contaminating the food.
3. Wash hands for 20 seconds with soap under warm running water before and after handling food and before touching anything else. Remember to wash your hands if you touch your face or hair or cough/sneeze into hands and after using the washroom.
4. Wash (in warm soapy water) and sanitize the counters before and after preparing food. Sanitize using a mixture of 1 teaspoon of bleach to 3 cups of water. (Tip: Sanitize by using a spray bottle filled with a bleach/water solution. Let air dry).
5. Wash in warm soapy water and sanitize anything that contacts food including: counters, cutting boards, knives, utensils.
6. Keep raw foods away from cooked foods. Use different plates and utensils for raw and cooked food.
7. Throw dirty cloths and towels into the laundry. Add 1 tsp of bleach to the wash to sanitize kitchen cloths and towels.
8. If it is not clean, don’t let it touch cooked foods or any other food that will be served raw.

Safe Storage

1. Keep raw and cooked foods stored at or below 4 ºC.
2. Put leftovers immediately into the fridge.
Safe Cooking and Holding

1. Keep foods outside the danger zone. Keep cold foods cold at or below 4 °C and hot foods hot (above 60 °C (140 °F ).
2. Most foods require cooking temperatures of at least 100 °C for a safe amount of time and foods should be reheated to at least 74 °C.

</table>
On the counter

**FRUIT**

Bananas, oranges, grapefruit, lemons, limes, pineapple, watermelons, tomatoes, apples and pears will keep for several days on the counter. Ripen avocados, kiwi fruit, apricots, peaches, cantaloupe, melons, nectarines, pears, plums on the counter then store them in the refrigerator for up to 5 days before using.

**VEGETABLES**

Garlic, shallot, onions and ginger like to be kept dry with plenty of ventilation. Mesh baskets/bags or paper bags in a cupboard are suitable.

In the fridge

**FRUIT**

Apples and pears can be stored for several weeks in the vegetable crisper. Berries, grapes, cut fruit, pineapple will only last a few days in the refrigerator.

**VEGETABLES**

Beans (green and yellow), broccoli, cauliflower, green onions will keep for between 5-7 days in the refrigerator. Cabbage, cucumbers, eggplant and peppers can keep for up to 2 weeks. Root vegetables like beets, carrots, rutabagas, turnips, will keep in plastic bags for several weeks in the fridge if stored in a plastic bag with a few holes to prevent accumulation of too much moisture. Lettuces and other greens are best kept in the vegetable crisper-keeping them in a closed container can make them last longer. Mushrooms can be stored in a paper bag and refrigerated for about 5 days.

In a cool, dark, dry and well ventilated area

Pumpkins, sweet potatoes, squash, cooking onions store best in a relatively dry, well ventilated area where the temperature is between 0-10ºC.
In a cool, dark, moist and well ventilated area

FRUIT

Apples and pears can be stored for several months in a dark cool area.

VEGETABLES

Root crops like beets, turnips, rutabagas and carrots can be stored for a few months if they are kept moist and at temperatures between 1-5 ºC.

In the dark in a cool area, potatoes can be stored for up to 8 months. Store in a potato bag (jute) or in a covered cardboard box with a few openings for ventilation. Potatoes need to be stored in the dark so that they do not produce the toxin solanine.

In the freezer

FRUIT

Apples-Peel and slice. Lay single layer on a cookie sheet and freeze. Transfer into freezer bags.
Berries-lay single layer of unwashed, dry berries on a cookie sheet and freeze. Transfer the frozen berries into freezer bags.

VEGETABLES

Before freezing vegetables, blanch them. Blanching means to plunge them into a pot of boiling water [time varies depending on vegetable] and then quickly put them into a bath of cold water before packing into freezer bags.

Beans, green: Wash and remove ends. Blanch for 1 minute, cool and drain. Transfer to freezer bags.

Beets: Wash, trim tops leaving ½ inch of stem. Cook in boiling water until tender [about 10-20 minutes]. Cool, peel, cut and transfer to freezer bags.

Broccoli/Cauliflower: Split into small pieces. Blanch for 1 minute, cool, drain, transfer to freezer bags.

Brussel sprouts: Trim and remove outer leaves. Blanch, cool, drain and transfer to freezer bags.

*If preparing For cabbage rolls, cut out the core, place in bag and freeze.
**Carrots:** Remove tops, peel, chop, blanch for 3 minutes. Cool. Place in single layer on cookie tray and freeze before transferring into freezer bags.

**Celery:** Wash and cut into 1 inch pieces. Blanch for 2 minutes, chill and let freeze in a single layer on a cookie sheet before transferring to a freezer bag.

**Parsnips:** Remove tops, wash, peel and cut into ½ inch slices. Blanch, cool, drain and transfer to freezer bags.

**Peas:** Shell, blanch for 1 minute. Lay single layer on a cookie sheet and freeze. Transfer into freezer bags.

**Tomatoes:** Wash and remove stems. Cut into smaller pieces or leave whole. Pack into freezer bags and freeze.

**Turnips:** Wash, peel and cut into ½ inch cubes. Blanch for 3 minutes, cool and drain.

---

**Appendix 5. Label Reading**

**Check the Ingredient List**

Ingredients are listed from most to least. The first 2 ingredients should be whole foods like milk, whole grains, fruit, and vegetable.

Look for sugar in foods. If sugar is the first or second ingredient, leave it on the shelf.

There are many words for sugar including: Honeycomb syrup, high fructose-corn syrup, molasses, sucrose, glucose-fructose.

Watch out for unhealthy fats. Look for the words: hydrogenated, shortening, lard, trans fats.
Check the Nutrition Facts Table

The **Nutrition Facts** table provides help to people who want to control the amount of calories, sodium, sugars and fat in their diet to manage or prevent chronic disease.

The **Nutrition Facts** table contains information on: the amount of **calories** and **13 nutrients** for a specific **amount** of a pre-packaged food.

The amount of food is provided in a common unit (cups, slices, tablespoon) and in grams.

The amount of nutrients are provided in grams or mg and expressed as a**% Daily Value**.

The **Daily Value** for each nutrient is based on a set of recommended nutrient intakes for Canadians.

The **% Daily Value** tells you if there is a little (5-10%) or if there is a lot (15% or more) of a nutrient in a serving.

This item is high in fibre.

---

**Look For:**

- **Higher %** Daily Value next to nutrients you are trying to increase in your diet, such as fibre, vitamins A and C, calcium and iron.
  - **Fibre**- Choose products more often that are ‘high’ in fibre (4 grams or more per serving)
- **Lower %** Daily Value for nutrients you are trying to decrease, such as fat, saturated and trans fats, sodium, sugar.
  - Choose foods with less than 5% DV (“low”) of **fat** (less than 3 grams per serving) or **sodium** (less than 140 mg).
  - Choose foods with less than 10% DV (“low”) for **Saturated Fat and Trans fat** as these fats increase blood cholesterol and the risk for heart disease.

People living with **diabetes** need to control their intake of carbohydrates and sugar to keep blood sugar levels stable. Every 4.5 grams of sugars= a teaspoon of sugar. Choose foods more often that contain low amounts of sugars.
Nutrition Claims

- “Free, “Low” or “reduced” means a food may have less calories, fat, saturated fat, sugar or sodium. “Good source” or “high” can help identify foods rich in fibre or vitamins and mineral.

- “Low in fat” means the food contains no more than 3g (grams) of fat in the amount of food specified in the Nutrition Facts.

- “Light” or “lite” may refer to the colour, taste and texture rather than the nutrient content.

- “Reduced in calories” means the food contains at least 25% less energy than the food to which it is compared. Example. A jam “reduced in calories” can be compared to the same brand’s regular product or products with a “no sugar added”.

- “Source of fibre” means the food contains at least 2g of dietary fibre in the amount of food listed under the Nutrition Facts. A food with the claim ‘High source of fibre’ contains at least 4g in that amount of food. It is recommended that most Canadians consume about 25g or more of fibre per day.

- “Less” is used to compare one product with another. For example, a box of crackers claiming to contain “50% less salt” will have half the sodium of the food to which it’s compared. It doesn’t necessarily mean the product is low in sodium, so check the sodium content in the Nutrition Facts.

Information on this resource has been taken from Articles on Food Labelling available at Health Canada’s nutrition labelling website. www.healthcanada.gc.ca/nutritionlabelling

Label Reading- Finding the Salt (sodium)

Pre-packaged food and food from restaurants is the major source of sodium in our diet. It accounts for 77% of the sodium that we eat.

Sodium, found mainly in salt, is linked to high blood pressure, a known cause of strokes. About 1 in 4 adults have high blood pressure.

Choose foods lower in sodium (under 200 mg/serving) and those foods labelled “low sodium” or with 5% Daily Value.

Check out these fast foods. Although some of them may not be high in calories, they can be quite high in sodium.

</table>
Label Reading- Finding the Fat

Pre-packaged food and foods eaten in restaurants are a major source of fat in our diet. Too much fat in our diet is linked to obesity, diabetes and other chronic diseases.

Choose foods more often that are lower in fat, Saturated Fat and Trans Fat.

Look at the nutrition facts menu in restaurants. Compare the fat in these food choices.

Label Reading- Finding the Sugar

Too much sugar in our diet has been linked to cavities, obesity and diabetes. Diabetics usually need to control the sugar, fat and sodium in their diet. Reading the ingredient list and the nutrition facts is a quick way of knowing if a food has a little or a lot of sugar.

Avoid foods and beverages that list sugar as the first or second ingredient.

Choose foods more often that contain 5g or less of sugars if the item is not a milk-based food or does not contain fruit as the first ingredient.

Choose fruit or fruit juice with “no sugars added” or unsweetened

Compare the sugar in these choices.

Appendix 6. Focus on Fats-What to Cut

**Fat** - Our bodies require fat to grow, absorb vitamins like A, D, E, K, develop and stay healthy health. Fat also carries flavour in our food and helps us feel full. For infants and toddlers, who have small stomachs, fat is an especially rich source of calories.

**Beneficial** - Unsaturated fats (fats that are liquid at room temperature) are beneficial, when consumed in moderation. Examples of unsaturated fat include eulachon grease, seal oil, salmon oil, canola oil, olive oil, flaxseed oil.

**Harmful** - Saturated Fat and Trans Fat from processed foods raise low-density lipoprotein (LDL), or “bad cholesterol,” levels, which increases the risk of coronary heart disease (CHD).

Saturated fat (fats that are solid at room temperature) are found in animals and animal products and some plant products and some pre-packaged foods.

Trans fat that harms is created through hydrogenation of vegetable oil. Using hydrogenation allows foods to stay on the shelves for longer. Some trans fat is made naturally in the gut of ruminants like cows, deer, moose, elk, sheep and goats: this trans fat is not considered to cause harm.

💡 Choosing foods low in saturated fat and trans fat (lower than 10% of DV) is an important part of prevention of chronic disease.

[See next page for a table on commonly eaten foods of total fat, saturated fat, and trans fat per serving.]
In the table below, can you spot those that are high in trans fat?

Appendix 8. Safer Use of Plastics for Food and Beverages

To help protect our families and the environment,

- choose glass or microwave-safe ceramics instead of plastic for food storage and heating,
- choose glass or stainless steel containers for drinking.

Use this chart to learn more about where these plastics are found.

<table>
<thead>
<tr>
<th>Plastic</th>
<th>Products</th>
<th>Safety</th>
</tr>
</thead>
<tbody>
<tr>
<td><strong>PETE</strong> Polyethylene teraphthalate</td>
<td>Soft drink, water and salad dressing bottles; peanut butter and jam jars</td>
<td>Considered safe</td>
</tr>
<tr>
<td><strong>HDPE</strong> High Density Polyethylene</td>
<td>Milk, juice and water bottles; trash and retail bags.</td>
<td>Considered safe</td>
</tr>
<tr>
<td><strong>PVC</strong> Polyvinyl Chloride</td>
<td>Juice bottles; cling films, PVC pipes</td>
<td>*Phthalates can leach into food if heated. Choose non-PVC products</td>
</tr>
<tr>
<td><strong>LDPE</strong> Low Density Polyethylene (LDPE)</td>
<td>Frozen food bags; squeezable bottles, e.g. honey, mustard; cling films; flexible container lids</td>
<td>Considered safe</td>
</tr>
<tr>
<td><strong>PP</strong> Polypropylene</td>
<td>Reusable microwaveable ware; kitchenware; yogurt containers; margarine tubs; microwaveable disposable take-away containers; disposable cups and plates.</td>
<td>Considered safe</td>
</tr>
<tr>
<td><strong>PS</strong> Polystyrene (Styrofoam)</td>
<td>Egg cartons; packing peanuts; disposable cups, plates, trays and cutlery; disposable take-away containers;</td>
<td>Considered stable but does not biodegrade and is a major form of pollution as still limited residential recycling</td>
</tr>
<tr>
<td><strong>PC</strong> Polycarbonate</td>
<td>Baby bottles, sippy cups, re-useable water bottles, pitchers, tableware and food storage containers, lining in canned food.</td>
<td>*Can contain Bisphenol A BPA can leach into food. DO NOT HEAT FOOD IN.</td>
</tr>
</tbody>
</table>
* In October 2008, the Government of Canada announced it would prohibit the importation, sale and advertising of polycarbonate baby bottles that contain bisphenol A (BPA) to reduce exposure to children under 18 months. It also announced it would act to reduce its entry into the environment: There is a concern that increasing levels entering the environment may prove harmful to fish and other aquatic life.

**Plastic Containers and non-stick coatings**

**Heating/Re-heating:** Plastic in non-microwave safe plastic containers and wrap leaches into food, especially when food is being heated at a high temperature in the microwave. Only use plastic containers and wrap labeled as microwave safe for cooking food in the microwave.

**Plastic wraps:** If using plastic wraps for food or heating, use a non-PVC (#3) wrap. Try to use glass or microwave-safe cookware instead.

**For Storage:** Let food cool down before transferring to non-microwave safe containers (like dairy containers) for storage to avoid any leaching of the plastic into the food. DO NOT REHEAT.

**Non-stick coatings:** The plastic, PFOA (perfluorooctanoic acid and its salts), used in non-stick coating, is known to cause cancer in rats. PFOA is being eliminated from cookware products. Keep utensils and cookware with nonstick plastic coatings to temperatures below 350°C (650°F). Pans heated to above 350°C can give off poisonous fumes.

**Plastic Cutting Boards (and Wood too)**

All cutting boards, plastic or wooden can build up levels of harmful bacteria. Follow these steps to kill bacteria after use of cutting boards

- After using, wash with hot soapy water or in an automatic dishwasher.
- Keep a spray bottle full of a sanitizing solution (1 teaspoon of chlorine bleach to 4 cups of water). Spray the cutting board surface and let air-dry. No need to rinse.

# Healthy Lunch Ideas

The following are healthy suggestions from the four food groups:

<table>
<thead>
<tr>
<th>Vegetables, Berries and Fruits</th>
<th>Whole Grains</th>
<th>Calcium Containing Foods</th>
<th>Meat and Alternatives</th>
</tr>
</thead>
<tbody>
<tr>
<td>• Fresh vegetables</td>
<td>• Baked whole wheat ban-</td>
<td>• Fortified soy or rice milk</td>
<td>• Wild meats (deer, elk,</td>
</tr>
<tr>
<td>• Fresh fruits</td>
<td>nock</td>
<td>2%, 1% or skim milk</td>
<td>moose)</td>
</tr>
<tr>
<td>• Canned fruit with no added</td>
<td>• Whole wheat bread, rolls,</td>
<td>• Canned or evaporated low</td>
<td>• Fish</td>
</tr>
<tr>
<td>sugar</td>
<td>buns &amp; bagels</td>
<td>fat milk</td>
<td>• Lean meat (pork, beef, lamb)</td>
</tr>
<tr>
<td>• Dried Fruit</td>
<td>• Melba Toast</td>
<td>• Yogurt</td>
<td>• Chicken, Turkey</td>
</tr>
<tr>
<td>• 100% Fruit Juice</td>
<td>• Corn Bread</td>
<td>• Cheese</td>
<td>• Canned fish (packed in water)</td>
</tr>
<tr>
<td>• Vegetable juice</td>
<td>• Rice Cakes</td>
<td>• Almonds</td>
<td>• Eggs</td>
</tr>
<tr>
<td></td>
<td>• Whole Grain Crackers</td>
<td>• Cottage Cheese</td>
<td>• Ham</td>
</tr>
<tr>
<td></td>
<td></td>
<td>• Canned sardines or salmon with bones</td>
<td>• Nut butters (almond, cashew, peanut)</td>
</tr>
<tr>
<td></td>
<td></td>
<td>• Rhubarb</td>
<td>• Veggie or turkey bologna, salami or hotdogs</td>
</tr>
<tr>
<td></td>
<td></td>
<td>• Greens: collard, spinach, Swiss chard, kale, turnip greens, mustard greens</td>
<td></td>
</tr>
<tr>
<td></td>
<td></td>
<td>• Fortified oatmeal</td>
<td></td>
</tr>
<tr>
<td></td>
<td></td>
<td>• Soy products: tofu, soy flour</td>
<td></td>
</tr>
<tr>
<td></td>
<td></td>
<td></td>
<td></td>

  butter
- Veggie slices and whole 
  grain crackers
- Raw nuts and fruit
- Apple slices and nut 
  butter
- Soy yogurt and sunflower 
  seeds
- Veggies and humus
- Almonds
Appendix 10. 21 Ways to Help your Body

1. Choose cooking methods that require little or no added fat such as roasting, broiling, baking, grilling, steaming, poaching, boiling instead of frying
2. Eat lots of vegetables, fruit and berries -5-8 servings everyday by including vegetables and/or fruit at meals or snacks.
3. Serve whole grain products more often than refined grains every day
4. Take the time to harvest traditional foods with your family
5. Choose whole grains more often than other grains every day
6. Include meat and meat alternatives at meals
7. Keep pre-packaged meats --cold cuts and deli meat, sausages, smokies, pepperoni/chicken sticks--that are high in salt (sodium) and fat off the table.
8. Serve vegetable protein like tofu, and beans--white, black, kidney, chickpeas, lentils in meals
9. Have fish at least 2 times a week
10. Enjoy milk and milk alternatives every day
11. Choose wholesome fresh food over packaged and processed food
12. Limit fat, saturated fat, trans fat, sugar and salt.
13. Become comfortable with reading labels to make healthier food choices
14. Choose packaged and processed food with low % DV (5% for sodium, 5% of fat, 10% for saturated fat and trans fat)
15. Choose water as a thirst quencher
16. Know what is in your food and beverages
17. Know what an appropriate portion size is
18. Buy local foods in season
19. Join a good food box or food coop
20. Plant some vegetables and berry bushes
21. Make time for cooking and eating together at the table with family and friends
Appendix 11. Tips for preparing a community feast

- Include dark green vegetables or orange vegetables on the table.
- Colour it up (see Appendix for serving a variety of fruit by season)
- Choose vegetables and fruit prepared with little or no added fat, sugar or salt.
- Keep fried foods off the table.
- Use smaller size plates, bowls, cups and glasses.
- Serve water or sparkling water or milk at the table instead of sugar drinks or coffee.
- Serve whole grain products instead of white starch products.
- Offer some dishes with beans, lentils or other legumes.
- Serve fish
- Select lean meat, wild game and alternatives prepared with little or no added fat, sugar or salt.
- Serve berries and fresh or canned fruit instead of cakes and pastries.
- Serve green salads but put the dressing on the side
- If serving coleslaw or pasta salad, use a low fat recipe
- Serve cream sauces, gravy, salad dressings and other condiments on the side
- Select foods that are produced and gathered locally more often.
