a Algorithm to define people who are removed from isolation is updated on February 5, 2021 to reflect change adopted by PHSA. Updated algorithm assigns cases who are lost to follow up and whose surveillance date (reported date and if not available then result date) >=20 days before the line list case dataset date to “removed from isolation.” One case is reported as “Out Of BC – Alberta.”
b Geographical Information (RHAs) for 27 BC First Nations people who are tested for COVID-19 is not available. They are included in total number of First Nations people tested in BC.
*Active case counts are suppressed as counts are less than 5.
** Active case counts are ≥ 5 but they are suppressed to prevent inadvertent identification of active cases in Vancouver Island region.

Note: Analyses for in or near community includes lab confirmed cases and epi-linked cases with known geographical information. Other cases (including case tested outside of BC) are included in the cases by Health Authority. As of August 7, 2021, there were 28 active First Nations COVID-19 cases in or near community.
The majority (73.3%) of cases among First Nations have occurred in those under age 50.

The cumulative percent positive for all COVID-19 test completed for First Nations in BC was 9.59% as of August 7, 2021. The rate of positive cases was 4,683.0 per 100,000 people among First Nations. The rate of positive case among other residents of BC was 2,937.5 per 100,000 people.

**Epidemic curve for COVID-19 cases among BC First Nations by episode date (coloured bar), surveillance date (line) and health authority, British Columbia February 23, 2020 (Week-9) – August 7, 2021 (Week-31, 2021 *) (n=7,603)**

---

*a Episode date is now defined as date of illness onset, hospital admission, or death. When those dates are not available, earliest lab date (collection date or result date) is used, and if unavailable, surveillance date is used. Report date used previously is now replaced with surveillance date (laboratory result date); if unavailable, report date is used.*
Data source: BCCDC’s line list data received from RHAs (up to August 5, 2021) and PHSA’s public health lab data (up to August 7, 2021). This epidemiological curve represents the weekly cases reported among First Nations in BC. The proportion of cases within each region is colour coded and the case counts each day are represented by the solid black line. The incidence per 100,000 are represented by the dotted line. Regions are represented in the diagram as: Fraser – Dark blue, Interior – Red, Northern – Light Blue, Vancouver Coastal – Orange, and Vancouver Island – Green.

First Nations COVID-19 Vaccination Coverage, by Health Authority
Doses 1 and 2 (PHSA e-form, PIR, dose 1=91,176, dose 2=71,956) 12+ years, up to August 7, 2021

First Nations COVID-19 Vaccination Coverage, by Age Group
Doses 1 and 2 (PHSA e-form, PIR, dose 1=91,764, dose 2=72,311), 12+ years, up to August 7, 2021

* Age group information was not available for 369 clients for dose 1 and 127 clients for dose 2
** These analyses were only possible for Status and Status eligible First Nations, and do not include non-status First Nations
Vaccine Distribution

- As of August 7, 2021, more than 102,000 individuals 18+ years of age and more than 7,800 individuals ages 12-17 who are First Nations people (and some non-First Nations people living in or near First Nations communities) have received one dose of a COVID-19 vaccine. Of these individuals, more than 82,100 First Nations people 18+ years of age and more than 3,600 First Nations individuals 12-17 years old have received two doses. This includes vaccines administered in First Nations communities, as well as outside of communities by regional health authorities.
- As of August 7, 69.1% of all status and status-eligible First Nations people in BC age 18 and older have received at least one dose of a COVID-19 vaccine.
- As of August 6, 81.8% (3,790,394) of eligible people 12 and older in BC have received their first dose of COVID-19 vaccine and 68.9% (3,195,128) have received their second dose.

Provincial COVID-19 Cases – Updated as of August 6, 2021, 3:30 p.m.

- Since the start of the pandemic, there have been 151,839 confirmed cases in BC, and 1,772 deaths from COVID-19.
- There are 2,411 active cases, 52 people are currently hospitalized and, of those, 24 people are in intensive care.
- Of the total number of cases, 147,627 (97.2%) people have fully recovered.

Reginal Breakdown of Total Number of COVID-19 Cases in BC (n=151,611)

*Total number of cases (n=151,839) include 228 cases reported as “Out of Canada” residents. Above figure provides regional distribution of COVID-19 cases (n=151,611) reported as BC residents.

**FNHA Response**

**Working with First Nations**
The FNHA is working in partnership with First Nations communities to ensure communities’ needs are met, including:

- Maintaining essential services to support First Nations communities during this pandemic.
- Providing COVID-19 funding resources and wrap around supports including for medical transportation, self-isolation and quarantine. See the FNHA Community Support Guide for more information. Support requests can be sent to COVID19needs@fnha.ca
- Supporting First Nations communities in refreshing their Pandemic Plans
- FNHA continues to maintain operations team availability to respond to COVID-19 support requests through the weekends during business hours.
- Launching virtual care services including First Nations Virtual Doctor of the Day and First Nations Virtual Substance Use and Psychiatry Service
- Site selection, training and deployment of Point of Care Testing for COVID-19 is underway.

**Working with Partners**
The FNHA is continuing to work with our provincial and federal partners towards aligning response efforts in support of First Nations communities and people living away from home across the province. This includes:

- Maintaining regular communication and updates with Regional Health Authorities, Emergency Management of BC, Ministry of Health, First Nations Leadership Council, and Indigenous Services Canada to proactively identify needs and address issues Supporting planning at both the provincial and regional level for the Rural, Remote and Indigenous Framework,
- FNHA is in discussions federally and provincially to support BC Restart including reopening of public buildings, and return to work and business operations for facilities where safe and appropriate.

**Vaccinations**
- The FNHA is working hard with our partners and First Nations communities to support vaccine distribution and planning and to prioritize available doses for First Nations communities
- Remote and isolated First Nations communities have been identified as a priority for vaccination with the first doses having arrived on December 29, 2020.

**Personal Protective Equipment**
- The FNHA continues to work with Federal and Provincial partners to obtain Personal Protective Equipment (PPE) for health care staff and first responders in all communities.
- First Nations communities requiring personal protective equipment during the COVID-19 emergency can send their requests to COVID19needs@fnha.ca.
