

Coronavirus disease (COVID-19) COMMUNITY SITUATION REPORT

FNHA Public Health Response

February 25, 2021

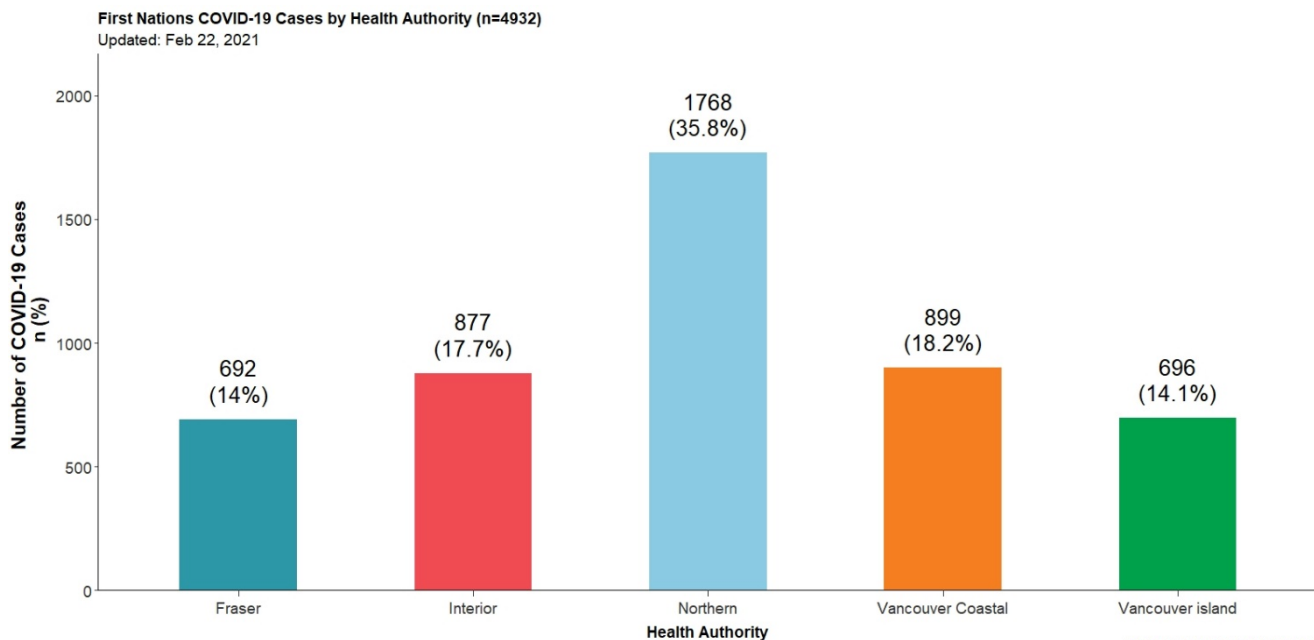

Note: Changes from the previous Community Situation Report are in red.

COVID-19 Updates

First Nations Cases in BC

As of February 22, 2021

- Total 4,941 First Nations COVID-19 cases (4,820 lab diagnosed cases and 121 epi-linked cases). This is an increase of 202 cases since February 22, 2021 report.
- Geographical information (In or near community/ off reserve) is available for 4,847 cases. Of these 4,847 cases, 2,218 (45.8%) cases are in or near community and 2,629 (54.2%) are off reserve.
- 334 active First Nations COVID-19 cases, 133 (39.8%) of the active cases are in or near community and 197 (59.0%) are off reserve. Information on in or near community/off reserve is not available for 4 active cases.
- Sadly, there have been total 83 COVID-19 related deaths reported among First Nations living in BC since the beginning of the pandemic. 5 additional deaths are reported after February 22, 2021 report.
- There have been a total 529 (11.0%) First Nations people hospitalized due to COVID-19 since March 1, 2020. Of these 245 hospitalizations are individuals who live in or near community and 283 off reserve. Information on in or near community/off reserve is not available for 1 case.

Data Sources: PRISA Public Health Lab Data and BCDC's COVID-19 Surveillance Line List

*Total number of cases (n=4,941) includes five COVID-19 cases reported as residents of Yukon, one case reported as "Out of Canada" resident and three cases reported as "Out of BC – Alberta" residents. Above figure provides regional distribution of COVID-19 cases (n=4,932) reported as BC residents.

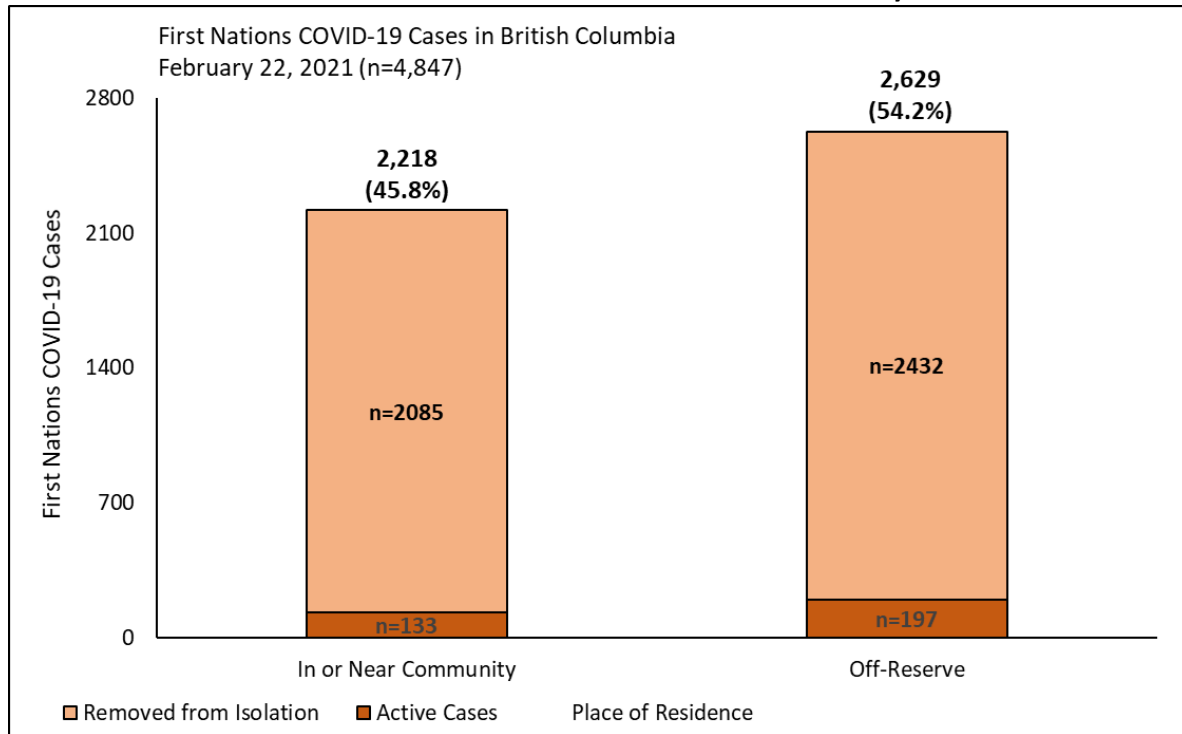

Regional Active cases and Testing data as of February 22, 2021

| | Fraser Salish | Interior | Northern | Vancouver Coastal | Vancouver Island | Total N (%) |
|--|---------------|----------|----------|-------------------|------------------|---------------------|
| Active First Nations COVID-19 Cases* | 38 | 46 | 151 | 37 | 59 | 334 |
| Total persons tested** | 7,296 | 7,590 | 9,035 | 7,251 | 7,300 | 38,498 ^c |
| Cumulative Percentage Positivity (%) | 6.54% | 8.89% | 14.47% | 7.95% | 7.48% | 9.22% |
| Testing Rate (Total tests per 100,000 First Nation Population) | 42,812.0 | 31,302.1 | 30,329.6 | 49,809.9 | 27,443.1 | 34,615.3 |

*Algorithm to define people who are removed from isolation" is updated on February 5, 2021 to reflect change adopted by PHSA. Updated algorithm assigns cases who are lost to follow up and whose surveillance date (reported date and if not available then result date) >=20 days before the line list case dataset date to "removed from isolation". This change reflects in reduced case counts for active cases in today's update.

**Geographical Information (RHAs) for 26 BC First Nations people who are tested for COVID-19 is not available and these 26 people are tested Negative.

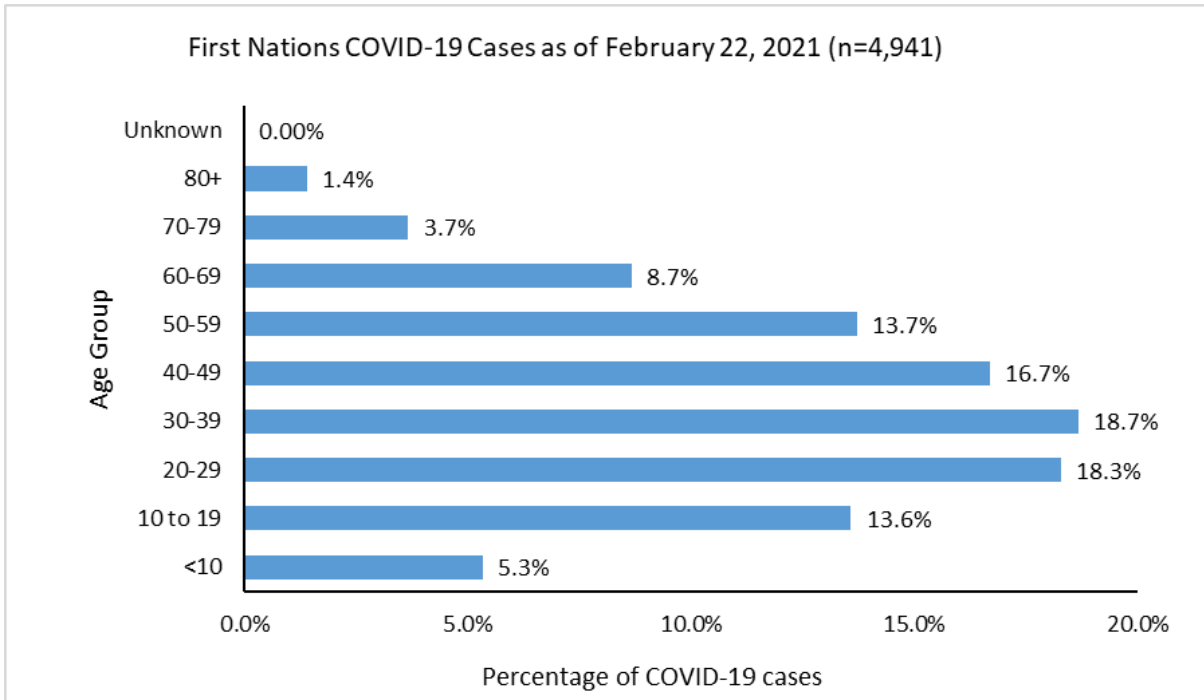

First Nations COVID-19 Cases in or near Community*

* In or near community analysis is not available for 4 active case.

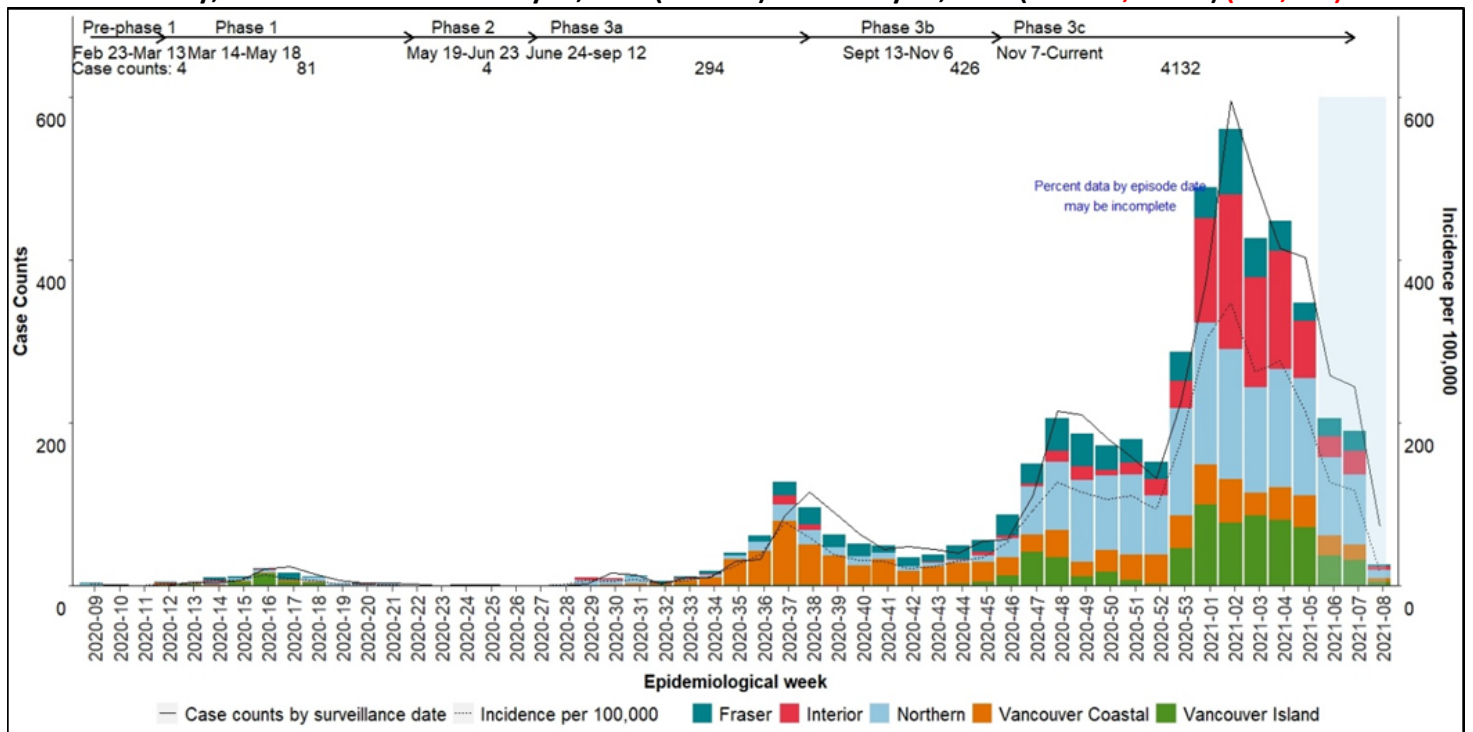

Note: Analyses for in or near community includes lab confirmed cases and epi-linked cases with known geographical information. Other cases (including case tested outside of BC) are included in the cases by Health Authority. **As of February 22, 2021, there were 133 active First Nations COVID-19 cases residing in or near community.**

The majority (72.6%) of cases among First Nations have occurred in those under age 50.

The cumulative percent positive for all COVID-19 test completed for First Nations in BC was 9.22% as of February 22, 2021. The rate of positive cases was 3,043.4 per 100,000 people among First Nations. The rate of positive case among other residents of BC was 1,484.3 per 100,000 people.

Epidemic curve for COVID-19 cases among BC First Nations by episode date (coloured bar)^a, surveillance date (line) and health authority, British Columbia February 23, 2020 (Week-9) – February 22, 2021 (Week-8, 2021*) (n=4,941)

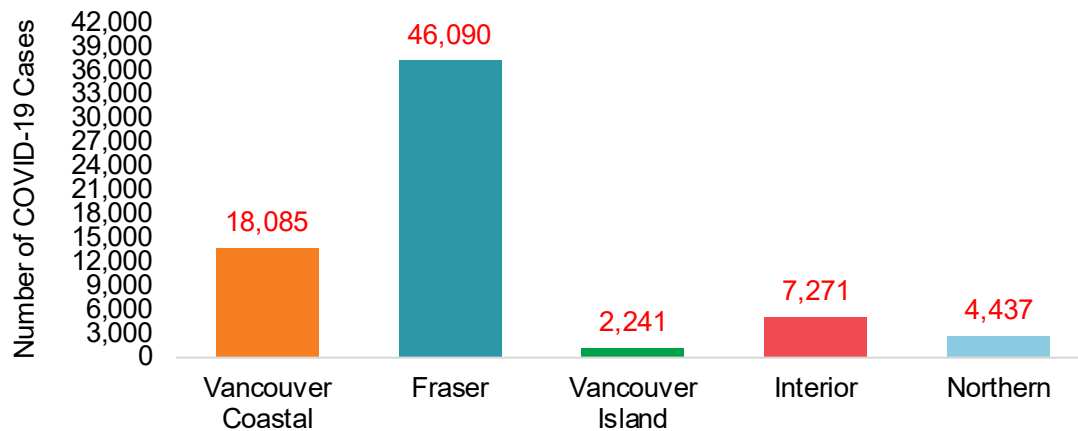

^a Episode date is now defined as dates of illness onset, hospital admission, or death. When those dates are not available, earliest lab date (collection date or result date) is used, and if unavailable, surveillance date is used. Report date used previously is now replaced with surveillance date (laboratory result date, if unavailable then report date).

^b Data source: BCCDC’s line list data received from RHAs (up to February 21, 2021) and PHSA’s public health lab data (up to February 22, 2021). This epidemiological curve represents the weekly cases reported among First Nations in the province of BC. The proportion of cases within each region is colour coded and the case counts each day are represented by the solid black line. The incidence per 100,000 are represented by the dotted line. Regions are represented by following coloured bars in the diagram: Fraser-Dark blue, Interior-Red, Northern-Light Blue, Vancouver Coastal-Orange, and Vancouver Island-Green.

Provincial COVID-19 Cases – Updated as of [February 24, 2021, at 3:00pm](#)

FNHA Response

Working with First Nations

The FNHA is working in partnership with First Nations communities to ensure the needs of communities are met, including:

- Maintaining essential services to support First Nations communities during this pandemic.
- Providing COVID-19 funding resources and wrap around supports including for medical transportation, self-isolation and quarantine. See the [FNHA Community Support Guide](#) for more information. Support requests can be sent to COVID19needs@fnha.ca
- Supporting First Nations communities in refreshing their Pandemic Plans
- FNHA continues to maintain operations team availability to respond to COVID-19 support requests through the weekends during business hours.
- Launching virtual care services including First Nations Virtual Doctor of the Day and First Nations Virtual Substance Use and Psychiatry Service
- Site selection, training and deployment of Point of Care Testing for COVID-19 is underway.

Working with Partners

The FNHA is continuing to work with our provincial and federal partners towards aligning response efforts in support of First Nations communities and people living away from home across the province. This includes:

- Maintaining regular communication and updates with Regional Health Authorities, Emergency Management of BC, Ministry of Health, First Nations Leadership Council, and Indigenous Services Canada to proactively identify needs and address issues Supporting planning at both the provincial and regional level for the Rural, Remote and Indigenous Framework,
- FNHA is in discussions federally and provincially to support BC Restart including reopening of public buildings, and return to work and business operations for facilities where safe and appropriate.

Vaccinations

- The FNHA is working hard with our partners and First Nations communities to support vaccine distribution and planning and to prioritize available doses for First Nations communities
- Remote and isolated First Nations communities have been identified as a priority for vaccination with the first doses arriving December 29, 2020.

Personal Protective Equipment

- The FNHA continues to work with Federal and Provincial partners to obtain Personal Protective Equipment (PPE) for health care staff and first responders in all communities.
- First Nations communities requiring personal protective equipment during the COVID-19 emergency can send their requests to COVID19needs@fnha.ca.
- Additional details in the FNHA Guide: Accessing Personal Protective Equipment for First Nations Communities: <https://www.fnha.ca/Documents/FNHA-Accessing-Personal-Protective-Equipment-for-First-Nations-Communities.pdf>
