First Nations Cases in BC
As of June 2, 2021

- There have been a total of 7,299 First Nations COVID-19 cases (7,113 lab diagnosed cases and 186 epi-linked cases). This is an increase of 14 cases since the last published report.
- Out of the total 7,299 cases, 3,108 (42.6%) are in or near community; 4,043 (55.4%) are off reserve. As geographical information is not available, information on in or near community/off reserve is not available for 148 (2.0%) cases.
- There are 67 active First Nations COVID-19 cases; 30 (44.8%) of the active cases are in or near community and 35 (52.2%) are off reserve. Information on in or near community/off reserve is not available for 2 active cases.
- Sadly, there have been total 130 COVID-19 related deaths reported among First Nations living in BC since the beginning of the pandemic. No additional deaths are reported since the last published report.
- There have been a total 787 (10.8%) First Nations people hospitalized due to COVID-19 since March 1, 2020. Of these 350 hospitalizations are individuals who live in or near community and 435 off reserve. Information on in or near community/off reserve is not available for 2 cases.

*Total number of cases (n=7,299) includes five (5) COVID-19 cases reported as residents of Yukon, one (1) case reported as “Out of Canada” resident and seven (7) cases reported as “Out of BC – Alberta” residents. Above figure provides regional distribution of COVID-19 cases (n=7,286) reported as BC residents.

a Algorithm to define people who are removed from isolation is updated on February 5, 2021 to reflect change adopted by PHSA. Updated algorithm assigns cases who are lost to follow up and whose surveillance date (reported date and if not available then result date) >=20 days before the line list case dataset date to “removed from isolation.”
b Geographical Information (RHAs) for 30 BC First Nations people who are tested for COVID-19 is not available. They are included in total number of First Nations people tested in BC.

First Nations COVID-19 Cases in or near Community*

First Nations COVID-19 Cases in British Columbia
June 2, 2021 (n=7,299)

- **In or Near Community**: 3,108 (42.6%) (n=3078)  
  - Removed from Isolation: 3,108 (42.6%)  
  - Active Cases: 3,108 (42.6%)  
  - Place of Residence: n=30

- **Off-Reserve**: 4,043 (55.4%) (n=4008)  
  - Removed from Isolation: 4,043 (55.4%)  
  - Active Cases: 4,043 (55.4%)  
  - Place of Residence: n=35

* In or near community analysis is not available for 2 active cases. Total number of cases (n=7,299) includes 148 cases without information on LHA of residence and “In or Near Community” analysis.

Note: Analyses for in or near community includes lab confirmed cases and epi-linked cases with known geographical information. Other cases (including case tested outside of BC) are included in the cases by Health Authority. As of June 2, 2021, there were 30 active First Nations COVID-19 cases in or near community.
The majority (73.2%) of cases among First Nations have occurred in those under age 50.

The cumulative percent positive for all COVID-19 test completed for First Nations in BC was 9.89% as of June 2, 2021. The rate of positive cases was 4,495.8 per 100,000 people among First Nations. The rate of positive case among other residents of BC was 2,801.7 per 100,000 people.

Epidemic curve for COVID-19 cases among BC First Nations by episode date (coloured bar), surveillance date (line) and health authority, British Columbia February 23, 2020 (Week-9) – June 2, 2021 (Week-22, 2021*) (n=7,299)

---

a Episode date is now defined as date of illness onset, hospital admission, or death. When those dates are not available, earliest lab date (collection date or result date) is used, and if unavailable, surveillance date is used. Report date used previously is now replaced with surveillance date (laboratory result date); if unavailable, report date is used.

b Data source: BCCDC’s line list data received from RHAs (up to June 1, 2021) and PHSA’s public health lab data (up to June 2, 2021). This epidemiological curve represents the weekly cases reported among First Nations in BC. The proportion of cases within each region is colour coded.
and the case counts each day are represented by the solid black line. The incidence per 100,000 are represented by the dotted line. Regions are represented by following coloured bars in the diagram: Fraser – Dark blue, Interior – Red, Northern – Light Blue, Vancouver Coastal – Orange, and Vancouver Island – Green.

**Provincial COVID-19 Cases** – Updated as of: June 4, 2021 at 3:50 p.m.
- Since the start of the pandemic, there have been 145,049 confirmed cases in BC, and 1,710 deaths from COVID-19
- There are 2,453 active cases, 224 people are currently hospitalized and, of those, 59 people are in intensive care
- Of the total number of cases, 140,835 (97%) people have fully recovered

![Graph showing the number of COVID-19 cases in BC by region](image)

*Total number of cases (n=144,866) includes 200 cases reported as “Out of Canada” residents. Above figure provides regional distribution of COVID-19 cases (n=144,666) reported as BC residents.*

**Active Outbreaks** (as of June 4, 2021)
- Long-term care/assisted living centres/independent living: 5 outbreaks
- Acute care units: 2 outbreaks

**Vaccine Distribution**
- Remote and isolated First Nations communities have been identified as a priority for vaccination and the first doses arrived on December 29. As of June 3, 2021, more than 94,800 individuals who are First Nations people (and some non-First Nations people living in or near First Nations communities) have received their first dose of the COVID-19 vaccine. More than 30,000 First Nations people have received a second dose. This includes vaccines administered in First Nations communities, as well as those administered by Regional Health Authorities outside of communities.
- As of June 3, 61.6% of all status and status-eligible First Nations people in BC age 18 and older have received at least one dose of a COVID-19 vaccine
- As of June 4, a total of 3,488,884 doses of vaccine have been administered in BC, of which 256,725 are second doses

* A geographic distribution of COVID-19 by Local Health Area can be found [here](#).
* A weekly update on Variants of Concern can be found [here](#).

**First Nations Community Statistics from Indigenous Services Canada (May 27, 2021):**
- Access Restrictions: **137 (-1)**
- Band Offices Inaccessible: **86 (same)**
- Security Checkpoints: **70 (-1)**
- State of Local Emergency: **50 (same)**
- EOC Activations: **111 (same)**

Working with First Nations
The FNHA is working in partnership with First Nations communities to ensure the needs of communities are met, including:

- Maintaining essential services to support First Nations communities during this pandemic.
- Providing COVID-19 funding resources and wrap around supports including for medical transportation, self-isolation and quarantine. See the FNHA Community Support Guide for more information. Support requests can be sent to COVID19needs@fnha.ca
- Supporting First Nations communities in refreshing their Pandemic Plans
- FNHA continues to maintain operations team availability to respond to COVID-19 support requests through the weekends during business hours.
- Launching virtual care services including First Nations Virtual Doctor of the Day and First Nations Virtual Substance Use and Psychiatry Service
- Site selection, training and deployment of Point of Care Testing for COVID-19 is underway.

Working with Partners
The FNHA is continuing to work with our provincial and federal partners towards aligning response efforts in support of First Nations communities and people living away from home across the province. This includes:

- Maintaining regular communication and updates with Regional Health Authorities, Emergency Management of BC, Ministry of Health, First Nations Leadership Council, and Indigenous Services Canada to proactively identify needs and address issues Supporting planning at both the provincial and regional level for the Rural, Remote and Indigenous Framework,
- FNHA is in discussions federally and provincially to support BC Restart including reopening of public buildings, and return to work and business operations for facilities where safe and appropriate.

Vaccinations
- The FNHA is working hard with our partners and First Nations communities to support vaccine distribution and planning and to prioritize available doses for First Nations communities
- Remote and isolated First Nations communities have been identified as a priority for vaccination with the first doses arriving December 29, 2020.

Personal Protective Equipment
- The FNHA continues to work with Federal and Provincial partners to obtain Personal Protective Equipment (PPE) for health care staff and first responders in all communities.
- First Nations communities requiring personal protective equipment during the COVID-19 emergency can send their requests to COVID19needs@fnha.ca.
