Events of First Nations People BY SEX

57.2% Male

42.8%
Female

Events of First Nations People BY AGE

28.7%40 Years and Older

71.3% Younger than 40 Rate of Toxic Drug Poisoning Events Involving First Nations People

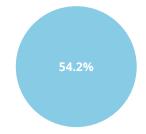

6.8x

First Nations people experienced an event rate 6.8x higher than other residents of the region in 2024.

First Nations People are Disproportionately Represented in Toxic Drug Poisoning Events

First Nations people make up 14.8% of the region's population.

54.2% of toxic drug poisoning events in 2024 were First Nations people.

NOTES

- Most toxic drug poisoning events are non-fatal and represent instances where paramedics were called and responded to a poisoning. Events that were treated successfully in community and events where 9-1-1 was not called are not captured in this data
- Event data is only collected for people with documented BC Personal Health Numbers (PHNs), and is therefore likely an underestimate, due to missing PHNs for some events
