did you know...

Early prenatal care, including all routine screening like syphilis testing, is essential for a healthy pregnancy.

These screenings are not just check-ups. They are a way to nurture and protect the future of your child.

By taking action early, you ensure the best care for you both.

EARLY SCREENING MATTERS!

did you know...

Syphilis infections are common and easy to diagnose and treat.

Having syphilis when you are pregnant can have serious impacts on your baby.

Getting tested is done with a simple blood test.

Your prenatal healthcare provider (Doctor, Midwife, or Nurse Practitioner) will order a test for you.

You can request a syphilis test at any time.

Syphilis infections are on the rise!
