Health through wellness

Artwork by Sterling Watts

The Hummingbird mark was chosen by Nurses as it represents delicacy and strength to endure hardships and struggles. Hummingbirds, like nurses are messengers of peace; they are gentle and caring; they heal your body and soul guiding you through the challenges that life can bring. Hummingbirds are independent and have unlimited energy, much like nurses. Nurse's work independently and work tireless hours tending to people's needs, they are supporters and friends. This special bird is capable of the most amazing feats despite its size and often travel great distances to find peace, nurses travel far to work with remote communities and embrace life in the work they do.
